These proportions may vary depending upon the perception of the Fund Manager, the intention being at all times to seek to protect the interests of the Unit holders. In case of any deviation, the portfolio shall be rebalanced within 30 calendar days.

As per Para 2.9 of SEBI Master Circular no. In case the portfolio of the scheme is not rebalanced within the aforementioned mandated plus extended timelines, the AMC shall not launch any new scheme till the time the portfolio is rebalanced and also not levy exit load, if any on the existing investors of the Scheme. However, at all times the portfolio will adhere to the overall investment objective of the Scheme.

Investment Strategy

The investment strategy is aimed at generating regular returns by investing in debt securities and at the same time attempting to enhance returns through investments in equity and equity related instruments.

a. Debt Portion

Investments may be made in such instruments, which, in the opinion of the Fund Manager, are of acceptable credit risk where chances of default are at a minimum. The Fund Manager may generally be guided by, but not restrained by, the ratings announced by various rating agencies on the assets in the portfolio. The maturity profile of debt instruments may be selected in accordance with the Fund Manager's view regarding market conditions, interest rate outlook and stability of rating.

Emphasis may be given to choosing securities, which, in the opinion of the Fund Manager, are less prone to default risk, while bearing in mind the liquidity needs arising out of the open-ended nature of the Scheme.

The Scheme is not restrained from investing in listed/unlisted and / or rated / unrated debt securities, Gilts / Government Securities, securities issued/guaranteed by the Central / State Governments, securities issued by public / private sector companies / corporations, financial institutions and / or money market instruments such as commercial paper, certificates of deposit, permitted securities under a repo agreement etc., provided the investments are within the limits indicated in the Asset Allocation Table. The instruments may carry fixed rate of return or floating rate of return or may be issued on discount basis. The Scheme may invest in call money / term money market in terms of RBI guidelines in this respect. Investment in unrated debt securities will be made with the prior approval of the Board of the AMC, provided the investment is in terms of the parameters approved by the Board of the Trustee. Where the

proposed investment is not within the parameters as mentioned above, approval of the Boards of both the AMC and the Trustee will be taken before making the investment.

The AMC will have an internal policy for selection of assets of the portfolio from time to time, taking into account multiple ratings, rating migration, credit premium over sovereign risk, general economic conditions and such other criteria. Such an internal policy from time to time will lay down maximum/minimum exposure for different ratings, norms for investing in unrated paper, liquidity norms and so on. Through such norms, the Scheme is expected to maintain a high quality portfolio and manage credit risk well.

b. Equity Portion

The investment strategy of the AMC will be directed to investing in stocks as indicated in the Asset Allocation Table, which, in the opinion of the Fund Manager, are priced at a material discount to their intrinsic value. Such intrinsic value will be a function of both past performance and future growth prospects. The process of discovering the intrinsic value will be through in-house research, supplemented by research available from other sources.

The scheme may invest in another scheme of the Kotak Mahindra Mutual Fund or any other Mutual Fund without charging any fees, provided that aggregate inter-scheme investment made by all schemes under the management of Kotak Mahindra Asset Management Company Limited or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of Kotak Mahindra Mutual Fund.

The Fund may underwrite primary issuances of securities subject to the Regulations.

Portfolio Turnover

Portfolio Turnover is a term used to measure the volume of trading that occurs in a Scheme's portfolio during a given time period. The scheme being an open ended scheme, it is expected that there would be frequent subscriptions and redemptions. Hence, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. Trading opportunities may arise due to changes in system liquidity, interest rate policy announced by RBI, shifts in the yield curve, change or anticipation of change in the credit worthiness or credit rating of securities or any other factors, which may lead to increase in the turnover.. If trading is done frequently there may be an increase in transaction cost such as brokerage paid etc. The fund manager will endeavour to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. The Scheme has no specific target relating to portfolio turnover.

Portfolio Turnover is a term used to measure the volume of trading that occurs in a Scheme's portfolio during a given time period. The scheme being an open ended scheme, it is expected that there would be frequent subscriptions and redemptions. Hence, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. Trading opportunities may arise due to changes in system liquidity, interest rate policy announced by RBI, shifts in the yield curve, change or anticipation of change in the credit worthiness or credit rating of securities or any other factors, which may lead to increase in the turnover. If trading is done frequently there may be an increase in transaction cost such as brokerage paid etc. The fund manager will endeavour to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. The Scheme has no specific target relating to portfolio turnover.
