#### Risks associated with investing in equity and equity related instruments

The risks associated with investments in equities and similar instruments include significant fluctuations in prices. The impact of fluctuations is likely to be accentuated for short-term investments. The risk that the performance of one or more companies declines or stagnates may have a negative impact on the performance of the Scheme as a whole at any given time.

Stock markets are volatile and can decline significantly in response to political, regulatory, economic, market and stock-specific developments etc.

The Scheme may hold such securities for only a very short time, which could tend to increase the costs. The Scheme may invest in growth stocks which may be more volatile than the market in general and may react differently to economic, political and market developments and to specific information about the issuer.

#### Risks associated with investing in fixed income securities

1. **Credit and Counterparty risk:** Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security or honor its contractual obligations).

Counterparty risk refers to the counterparty's inability to honor its commitments (payment, delivery, repayment, etc.) and to risk of default. This risk relates to the quality of the counterparty to which the scheme has exposures. Losses can occur in particular for the settlement/delivery of financial instruments or the conclusion of financial derivatives contracts.

 Liquidity Risk: The liquidity of the scheme's investment is inherently restricted by trading volumes in the securities in which the scheme invests.

A lower level of liquidity affecting an individual security or an entire market at the same time, may have an adverse bearing on the value of the scheme's assets.

- 3. Interest Rate Risk & Re-investment Risk: Interest rates may be influenced by several elements or events, such as monetary policy, the discount rate, inflation, etc. The value of debt and fixed income securities held by the Scheme generally will vary inversely with the changes in prevailing interest rates. In general, price of debt and fixed income securities go up when interest rates fall, and vice versa. Securities of any issuer that has higher duration could be riskier in terms of price movements relative to those with lower duration. Any impact of interest rate changes would be higher on securities with higher duration irrespective of the status of the issuer of the security. Reinvestment risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested.
- 4. Sovereign risk: The credit risk on such Government securities is even lower than that on non-government securities "AAA" rating and hence yields on government securities are even lower than yields on non- government securities with "AAA" rating.
- 5. Concentration Risk: The Scheme may pursue only a limited degree of diversification. It may invest in a limited number of securities or invest a greater proportion of assets in the securities of very few issuers (within the limits permitted by regulation) or be concentrated on a few market sectors as compared to a diversified scheme. The scheme is also expected to have higher market liquidity risk on account of concentration.

#### Risk Factors associated with Investments in Derivatives

Derivative products are specialized instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable.

Some of the risks inherent to derivatives investments include:

- Price Risk: Despite the risk mitigation provided by various derivative instruments, there remains an inherent price risk which may result in losses exceeding actual underlying.
- Default Risk: This is the risk that losses will be incurred due to default by counter party. This is also known as credit risk or counterparty risk.
- Basis Risk: This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying being hedged for e.g., mismatch between the maturity date of the futures and the actual selling date of the asset.
- 4. **Limitations on upside:** Derivatives when used as hedging tool can also limit the profits from a genuine investment transaction.
- Liquidity risk: This risk pertains to how saleable a security is in the market. All securities/instruments irrespective of whether they are equity, bonds or derivatives may be exposed to liquidity risk (when the sellers outnumber buyers) which may impact returns while exiting opportunities.
- 6. Execution Risk: The prices which are seen on the screen need not be the same at which execution will take place.

#### Risks for writing covered call options for equity shares

- Writing call options are highly specialized activities and entail higher than ordinary investment risks. In such investment
  strategy, the profits from call option writing are capped at the option premium, however the downside depends upon the
  increase in value of the underlying equity shares. Being a covered call, the downside risk is not unlimited, but limited to the
  extent of change in the price of underlying security held by the Fund.
- The Scheme may write covered call option only in case it has adequate number of underlying equity shares as per regulatory requirement. This would lead to setting aside a portion of investment in underlying equity shares. If covered call options are sold to the maximum extent allowed by regulatory authority, the scheme may not be able to sell the underlying equity shares immediately if the view changes to sell and exit the stock. The covered call options need to be unwound before the stock positions can be liquidated. This may lead to a loss of opportunity or can cause exit issues if the strike price at which the call option contracts have been written become illiquid. Hence, the scheme may not be able to sell the underlying equity shares, which can lead to temporary illiquidity of the underlying equity shares and result in loss of opportunity.
- The writing of covered call option would lead to loss of opportunity due to appreciation in value of the underlying equity shares. Hence, when the appreciation in equity share price is more than the option premium received the scheme would be at a loss.
- The total gross exposure related to option premium paid and received shall not exceed the regulatory limits of the net assets of the scheme.

#### Risk factors specific to investments in foreign securities

The net assets, distributions and income of the Scheme may be affected adversely by fluctuations in the value of certain foreign currencies relative to the Indian Rupee to the extent of investments in these securities. Repatriation of such investment may also be affected by changes in the regulatory and political environments. Market risks can be greater with respect to political instability, lack of complete or reliable information, market irregularities or high taxation.

### Risks associated with Securities Lending

The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e., the Scheme and the approved intermediary. Such failure to comply can result in a possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities, and this can lead to temporary illiquidity.

#### Risks associated with investing in mutual fund units

To the extent of the investments in units of mutual funds, the risks associated with investing in such funds like market risk, credit & default risk, liquidity risk, redemption risk including the possible loss of principal; etc. will exist.

#### Risk associated with investment in ETF

- ETFs are typically designed to track the performance of certain indices, market sectors or groups of assets such as stocks, bonds or commodities. ETF managers may use different strategies to achieve this goal but in general they do not have the discretion to take defensive positions in declining markets. Investors must be prepared to bear the risk of loss and volatility associated with the underlying index/assets.
- Investments in the securities constituting the Index/commodities are subject to price fluctuation on daily basis. The
  volatility in the value of those securities is due to various micro and macroeconomic factors like economic and political
  developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on the NAV of
  Scheme
- The units of the Scheme are to be listed on stock exchanges. However, there can be no assurance that an active secondary
  market will develop or be maintained.
- Any change in trading rules, regulation and policy by the regulatory authority would have a bearing on the trading of the units of the ETF and its prices.
- Trading in units of the Scheme on the exchange may be halted due to market conditions or for reasons that in view of the stock exchange or SEBI, trading in the units of the Scheme is not advisable.

#### Risk factors associated with investments in REITs and InvITs

Investments in REITs/InvITs carry liquidity risk, price risk/market risk, interest rate risk, reinvestment risk, credit risk, regulatory/ legal of lower than expected distributions

#### Risks associated with segregated portfolio:

- Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.
- Security comprises of segregated portfolio may not realise any value.
- Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There
  may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly
  lower than the prevailing NAV.
- Trading in the units of segregated portfolio on the Exchange may be halted because of market conditions, including any halt
  in the operations of Depository Participants or for reasons that in view of the Exchange Authorities or SEBI, trading in the
  units is suspended and / or restricted.

#### Risks associated with investing in securitised debt

The Scheme may invest in domestic securitized debt such as asset backed securities (ABS) or mortgage-backed securities (MBS). As compared to the normal corporate or sovereign debt, securitized debt is normally exposed to a higher level of reinvestment risk.

**Pass through Certificate (PTC)** (Pay through or other Participation Certificates) represents beneficial interest in an underlying pool of cash flows. These cash flows represent dues against single or multiple loans originated by the sellers of these loans. These loans are given by banks or financial institutions to corporates. PTCs may be backed, but not exclusively, by receivables of personal loans, car loans, two-wheeler loans and other assets subject to applicable regulations.

## How the risk profile of securitized debt fits into the risk appetite of the scheme

Securitized debt is a form of conversion of normally non-tradable loans to transferable securities. This is done by assigning the loans to a special purpose vehicle (a trust), which in turn issues Pass-Through-Certificates (PTCs). These PTCs are transferable securities with fixed income like characteristics. The risk of investing in securitized debt is similar to investing in debt securities. In addition, securitized debt may also carry prepayment risk and has a relatively higher liquidity risk. However, if the fund manager evaluates that the additional risks are suitably compensated by the higher returns, he may invest in securitized debt up to the limits specified in the asset allocation table.

#### Risk Factors associated with investments in debt instruments having Structured Obligations

The risks factors stated for debt instruments having Structured Obligations (SO) are in addition to the risk factors associated with fixed income instruments:

- SO rated securities are often complex structures, with a variety of credit enhancements. Debt securities lack a welldeveloped secondary market in India, and due to structured nature of SO securities, the liquidity in the market for these instruments is adversely affected compared to similar rated debt instruments. Hence, lower liquidity of such instruments, could lead to inability of the scheme to sell such debt instruments and generate liquidity for the scheme or higher impact cost when such instruments are sold.
- In case of SO transactions, comingling risk and risk of servicer increases the overall risk for the securitized debt or assets backed transactions. Therefore, apart from issuer level credit risk such debt instruments are also susceptible to structure related credit risk.

	Other Risks							
	• <b>Risk associated with inflation</b> : Over time, yields of short-term investments may not keep pace with inflation, leading to reduction in an investment's purchasing power.							
	<ul> <li>Legal risk: The scheme may be affected by the actions of government and regulatory bodies. Legislation could be impose retrospectively or may be issued in the form of internal regulations which the public may not be aware of. Legislatio (including legislation relating to tax) or regulation may be introduced which inhibits the scheme from pursuing the strategies or which renders an existing strategy less profitable than anticipated. Such actions may take any form, for example nationalization of any institution or restrictions on investment strategies in any given market sector or changin requirements and imposed without prior warning by any regulator.</li> <li>Taxation risk: The value of an investment may be affected by the application of tax laws, including withholding tax, or example nationalization.</li> </ul>							
	changes in government or economic or monetary policy from time to time. As such, no guarantee can be given that th financial objectives will actually be achieved. The tax information described in this Scheme Information Document (SID) as available under the prevailing taxation laws. This could be changed at any moment by regulation. Further, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the scheme wi endure indefinitely.							
	• Valuation risk: This risk relates to the fact that markets, in specific situations and due to lack of volumes of transaction do not enable an accurate assessment of the fair value of invested assets. In such cases, valuation risk represents the possibility that, when a financial instrument matures or is sold in the market, the amount received is less than anticipated incurring a loss to the portfolio and therefore impacting negatively the NAV of the scheme.							
	• <b>Operational Risk:</b> Operational risk addresses the risk of trading and back office or administration issues that may resu in a loss to the Scheme. This could be the result of oversight, ineffective securities processing procedures, compute systems problems or human error. There could also be risk associated with grouping of orders. For instance, at the time or placing the trades, the fund manager shall group orders on behalf of all schemes managed by him, provided it is unlike to be detrimental overall for any of the schemes whose orders have been included. However, such grouping may have detrimental effect to the scheme compared to the execution of an individual order for the scheme.							
	• Risk factors associated with processing of transaction in case of investors investing in mutual fund units through Stoc Exchange Mechanism: The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognized stock exchange(s), on any Business Day will depend upon the modalities or processing viz. collection of application form, order processing / settlement, etc. upon which the Fund and the AMC have no control. Moreover, transactions conducted through the stock exchange(s) upon which the Fund and the AMC have r control. Accordingly, there could be negative impacts to the investors such as delay or failure in allotment / redemption of Units. The Fund and the AMC are not responsible for the negative impacts.

## 16. EMPLOYEE UNIQUE IDENTIFICATION NUMBER (EUIN):

SEBI has made it compulsory for every employee/ relationship manager/ sales person of the distributor of Mutual Fund products to quote the EUIN obtained by him/her from AMFI in the Application Form. EUIN, particularly in advisory transactions, would assist in addressing any instance of mis-selling even if the employee/relationship manager/sales person later leaves the employment of the distributor. Individual ARN holders including senior citizens distributing Mutual Fund products are also required to obtain and quote EUIN in the Application Form. Hence, if your investments are routed through a distributor please ensure that the EUIN is correctly filled up in the Application Form.

However, if your distributor has not given you any advice pertaining to the investment, the EUIN box may be left blank. In this case, you are required to provide a duly signed declaration to this effect. Distributors are advised to ensure that the sub broker affixes his/her ARN code in the column separately provided in addition to the current practice of affixing the internal code issued by the main ARN holder and the EUIN of the Sales Person (if any) in the EUIN space.

### **17. BENEFICIAL OWNERSHIP DETAILS:**

Under the Prevention of Money Laundering Act, 2005 ("PMLA"), all intermediaries including mutual funds are required to obtain sufficient information from their clients in order to identify and verify the persons who beneficially own or control the account. SEBI circular dated January 24, 2013 (and additional circulars issued by SEBI/ under PMLA in this regard from time to time) on identification of Beneficial Ownership has prescribed a uniform approach to be followed for determination of beneficial owners. A 'Beneficial owner is defined as a natural person/s who ultimately own, control or influence a client and/or persons on whose behalf a transaction is being conducted, which includes persons who exercise ultimate effective control over a legal person or arrangement.

All categories of investors except individuals, company listed on a stock exchange or majority owned subsidiary of such company, are requested to provide details about beneficial ownership in the Application Forms for all their investments. The Fund reserves the right to reject applications/restrict further investments or seek additional information from investors who have not provided the requisite information on beneficial ownership. In the event of change in beneficial ownership, investors are requested to immediately update the details with the Fund/Registrar.

## 18. FATCA & CRS DETAILS:

FATCA and CRS requirements may require disclosure regarding your investment in the units of the Scheme. The Foreign Accounts Tax Compliance Act is a United States ("US") law aimed at prevention of tax evasion by US citizens and residents ("US Persons") through use of offshore accounts.

The Government of India and the United States of America (USA) have reached an agreement in substance on the terms of an Inter Governmental Agreement (IGA) to implement FATCA and India is now treated as having an IGA in effect from April 11, 2014. On similar lines the Organization of Economic Development (OECD) along with G-20 countries has released a 'Standard for Automatic Exchange of Financial Account Information in Tax Matters' commonly known as Common Reporting Standard ('CRS'). India is signatory to the Multilateral Competent Authority Agreement (MGM) for the purposes of CRS. Under FATCA/ CRS provisions, Financial Institutions are obligated to obtain information about the financial accounts maintained by investors and report to the local Government notified tax authorities. In accordance with FATCA and CRS provisions, the AMC / Mutual Fund is required to undertake due diligence process and identify foreign reportable accounts and collect such information / documentary evidences of the FATCNCRS status of its investors / Unit holders and disclose such information (through its agents or service providers) as far as may be legally permitted about the holdings/ investment returns to US Internal Revenue Service (IRS)/any other foreign government or the Indian Tax Authorities, as the case may be for the purpose of onward transmission to the IRS/ any other foreign government pursuant to the new reporting regime under FATCA/CRS.

FATCA/CRS due diligence will be directed at each investor / Unit holder (including joint investor/Unitholder) and on being identified as a reportable person, all the folios will be reported. In case of folios with joint holders, the entire account value of the investment portfolio will be attributable under each such reportable person. An investor / Unit holder will therefore be required to comply with the request of the AMC / Mutual Fund to furnish such information as and when sought by the AMC for the AMC / Mutual Fund to comply with the information reporting requirements stated in circulars issued by local Government notified tax authorities/ SEBI / AMFI in this regard. The information disclosed may include (but is not limited to) the identity of the investors/Unitholder(s) and their direct or indirect beneficiaries, beneficial owners and controlling persons. Investors / Unitholders should consult their own tax advisors regarding FATCA/CRS requirements with respect to their own status.

The AMC/ Mutual Fund reserves the light to reject any application/ freeze any folio(s) held directly or beneficially for transactions in the event the applican/ Unitholder(s) fail to furnish the relevant information and/or documentation in accordance with FATCA/CRS provisions and as requested by the AMC/ MutualFund.

The application form for FATCA/CRS self-declaration is also available on our website (www.barodabnpparibasmf.in)
