Portfolio Concentration Norms

In line with Clause 3.4 of SEBI Master Circular, specifies following portfolio concentration norms to be adopted by index fund:

- a) The index shall have a minimum of 10 stocks as its constituents.
- b) For a sectoral/ thematic Index, no single stock shall have more than 35% weight in the index. For other than sectoral/ thematic indices, no single stock shall have more than 25% weight in the index.
- c) The weightage of the top three constituents of the index, cumulatively shall not be more than 65% of the Index.
- d) The individual constituent of the index shall have a trading frequency greater than or equal to 80% and an average impact cost of 1% or less over previous six months.

The underlying index i.e. Nifty Next 50 Index complies with the aforesaid portfolio concentration norms. Further, the Fund shall evaluate and ensure compliance to aforesaid norms at the end of every calendar quarter. The updated constituents of the underlying index have also been made available on the website of the Fund i.e. www.bandhanmutual.com.

Change in Investment Pattern

Portfolio Rebalancing:

Pursuant to clause 3.6.7.1 of SEBI Master circular, in case of change in constituents of the index due to periodic review, the portfolio of the scheme will be rebalanced within 7 calendar days.

Further, any transactions undertaken in the portfolio of Index Schemes in order to meet the redemption and subscription obligations shall be done ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.

In the event of involuntary corporate action, the scheme shall dispose the security not forming part of the underlying index within 7 calendar days from the date of allotment/listing.

Rebalancing due to Short Term Defensive Consideration:

Subject to para 1.14.1.2 of the Master Circular for mutual fund, the asset allocation pattern indicated above may change for a short-term period on defensive considerations, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. These proportions may vary depending upon the perception of the Fund Manager, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be rebalanced within 7 calendar days from the date of deviation and further action may be taken as specified under SEBI Circulars/ AMFI guidelines issued from time to time.

Portfolio Replication norms

Subject to Clause 3.6.7.2 of SEBI Master Circular, any transactions undertaken in the scheme portfolio in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.

Disclosure Norms:

I. Portfolio:

As per clause 3.6.8 of SEBI Master Circular:

- A. The Fund shall disclose the following on monthly basis:

- Name and exposure to top 7 issuers and stocks respectively as a percentage of NAV of the scheme
 - Name and exposure to top 7 groups as a percentage of NAV of the scheme.
 - Name and exposure to top 4 sectors as a percentage of NAV of the scheme.
- B. Change in constituents of the index, if any, shall be disclosed on the AMC website on the day of change.

II. Tracking Error:

As per Clause 3.6.3.1(c) of SEBI Master Circular Fund, shall disclose the tracking error based on past one year rolling data, on a daily basis, on the website of respective AMCs and AMFI.

III. Tracking Difference:

As per Clause 3.6.3.2 (a) of SEBI Master Circular, the annualized difference of daily returns between the index and the NAV of the Fund shall be disclosed on the website of the AMC and AMFI, on a monthly basis, for tenures 1 year, 3 year, 5 year, 10 year and since the date of allotment of units.

B. WHERE WILL THE SCHEME INVEST?

The corpus of the Scheme will be invested in equity and equity related products & in debt and money market instruments. Subject to the Regulations, the corpus of the Scheme can be invested in any (but not exclusively) of the following securities / instruments:

1. Equity and Equity related instruments belonging to Nifty Next 50 Index.
2. Equity Derivatives
3. Debt securities and money market instruments including G-Sec/T-Bills/Cash Management Bills and TREPS
4. Certificate of Deposits (CDs).
5. Commercial Paper (CPs).
6. Other Mutual Funds
7. Any other securities / instruments as may be permitted by SEBI from time to time, subject to regulatory approvals if any.

The securities mentioned above could be listed, privately placed, secured, unsecured and of any maturity. The securities may be acquired through secondary market operations, private placement, rights offers or negotiated deals.

Pending deployment of funds of the Scheme in securities in terms of the investment objective of the Scheme, the AMC may park the funds of the Scheme in short term deposits of scheduled commercial banks, subject to the guidelines mentioned under clause 12.16 of SEBI Master Circular. The AMC shall not charge any investment management and advisory fees for parking of funds in such short term deposits of scheduled commercial banks for the scheme.

The Scheme may participate in securities lending as permitted under the Regulations, from time to time.

Detailed definition and applicable regulations/guidelines for each instrument is included in Section II.

C. WHAT ARE THE INVESTMENT STRATEGIES?

The Scheme will be managed passively with investments in stocks in proportion to the weights of these stocks in the Nifty Next 50 Index. The investment strategy would revolve around reducing the tracking

error through rebalancing the portfolio, considering the change in weights of stocks in the index as well as the incremental collections/redemptions from the Scheme.

Procedure & Recording of Investment Decisions and Risk Control

Please refer to Statement of Additional Information (SAI) available on website www.bandhanmutual.com.

Tracking Error

The extent to which the NAV of the scheme moves in a manner inconsistent with the movements of the total returns of the Nifty Next 50 Index on any given day or over any given period of time arising from any cause or reason whatsoever including but not limited to differences in the weightage of the investments in the securities and the weightage to such securities in the Nifty Next 50 Index and the time lags in deployment or realization of funds under the Scheme as compared to the movement of or within the Nifty Next 50 Index as well as the market liquidity, cost of trading, management and other expenses.

Tracking errors may result from a variety of factors including but not limited to:

- Any delay experienced in the purchase or sale of shares due to illiquidity of the market, settlement and realization of sale proceeds and / or the registration of any securities transferred and / or any delays in receiving cash IDCW and resulting delays in reinvesting them.
- The Nifty Next 50 Index reflect the prices of securities at close of business hours. However, the Fund may buy or sell the securities at different points of time during the trading session at the then prevailing prices which may not correspond to the closing prices on the BSE.
- Asia Index Private Limited (AIPL) undertakes periodic reviews of the securities that are represented in the Nifty Next 50 Index and from time to time may exclude existing securities or include new ones. In such an event, the Fund will endeavour to reallocate its portfolio but the available investment/ disinvestment opportunities may not permit precise mirroring of the Nifty Next 50 Index in a short period of time.
- The charging of expenses to the Fund including investment management fees and custodian fees.
- The potential for trades to fail which may result in the Scheme not having acquired shares at a price necessary to track the index.
- The holding of a cash position and accrued income prior to distribution and accrued expenses.
- Disinvestments to meet redemptions, recurring expenses, IDCW payouts etc.

INVESTMENT IN DERIVATIVES

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

(i) Trading in Derivatives

The Scheme may use derivatives instruments like Stock/ Index Futures & Options, or such other derivative instruments as may be introduced from time to time and in the manner permitted by SEBI/RBI from time to time.

The following information provides a basic idea as to the nature of the derivative instruments proposed to be used by the Scheme and the risks attached there with.

Features of Derivatives:

Derivatives provide unique flexibility to the Scheme to hedge part of its portfolio. Some of the features of specific derivatives are as under:

ii) Derivatives Strategy

Equity Derivative

The Scheme intends to use derivatives for purposes that may be permitted by SEBI Mutual Fund regulations from time to time. Derivatives instruments may take the form of Futures, Options, Swaps or any other instrument, as may be permitted from time to time. SEBI has vide its Master Circular under Clause 7.5 specified the guidelines pertaining to trading by Mutual Fund in Exchange trades derivatives. All Derivative positions taken in the portfolio would be guided by the following principles:

i. Position limit for the Fund in index options contracts a. The Fund position limit in all index options contracts on a particular underlying index shall be Rs. 500 crore or 15% of the total open interest of the market in index options, whichever is higher per Stock Exchange.

b. This limit would be applicable on open positions in all options contracts on a particular underlying index.

ii. Position limit for the Fund in index futures contracts:

a. The Fund position limit in all index futures contracts on a particular underlying index shall be Rs. 500 crore or 15% of the total open interest of the market in index futures, whichever is higher, per Stock Exchange.

b. This limit would be applicable on open positions in all futures contracts on a particular underlying index.

iii. Additional position limit for hedging

In addition to the position limits at point (i) and (ii) above, Fund may take exposure in equity index derivatives subject to the following limits:

a. Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Fund's holding of stocks.

b. Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Fund's holding of cash, government securities, T-Bills and similar instruments.

iv. Position limit for the Fund for stock based derivative contracts:

The Fund position limit in a derivative contract on a particular underlying stock, i.e. stock option contracts and stock futures contracts, :-

a. The combined futures and options position limit shall be 20% of the applicable MWPL.

b. The MWPL and client level position limits however would remain the same as prescribed

v. Position limit for the Scheme

The position limits for the Scheme and disclosure requirements are as follows—

a. For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a Fund shall not exceed the higher of:

- 1% of the free float market capitalisation (in terms of number of shares) Or
- 5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts).

b. This position limit shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.

c. For index-based contracts, the Fund shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.”

The Scheme will comply with provisions specified in clause 12.25 of Master Circular related to overall exposure limits applicable for derivative transactions.

The following section describes some of the more common equity derivatives transactions along with their benefits:

1. Basic Structure of a Stock & Index Future

The Stock Index futures are instruments designed to give exposure to the equity markets indices. The stock Exchange, Mumbai (BSE) and The National Stock Exchange (NSE) provide futures in select stocks and indices with maturities of 1, 2 and 3 months. The pricing of a stock/index future is the function of the underlying stock/index and short-term interest rates.

Example using hypothetical figures:

1. month NIFTY 50 Index Future

Say, Fund buys 1,000 futures contracts; each contract value is 50 times futures index price

Purchase Date: February 24, 2021

Spot Index: 6000

Future Price: 6150

Say, Date of Expiry: March 24, 2021

Say, Margin: 20%

Assuming the exchange imposes total margin of 20%, the Investment Manager will be required to provide total margin of approx. Rs. 6.15 Cr (i.e. $20\% * 6150 * 1000 * 50$) through eligible securities and cash.

Date of Expiry:

Assuming on the date of expiry, i.e. March 24, 2021, Nifty 50 Index closes at 6200, the net impact will be a profit of Rs 25,00,000 for the fund i.e. $(6200 - 6150) * 1000 * 50$

Futures price = Closing spot price = 6200.00

Profits for the Fund = $(6200 - 6150) * 1000 * 50 = \text{Rs. } 25,00,000/-$

Please note that the above example is given for illustration purposes only. Some assumptions have been made for the sake of simplicity.

The net impact for the Fund will be in terms of the difference of the closing price of the index and cost price. Thus, it is clear from the example that the profit or loss for the Fund will be the difference of the closing price (which can be higher or lower than the purchase price) and the purchase price. The risks associated with index futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures.

2. Basic Structure of an Equity Option:

An option gives a buyer the right but does not cast the obligation to buy or sell the underlying. An option is a contract between two parties wherein the buyer receives a privilege for which he pays a fee (premium) and the seller accepts an obligation for which he receives a fee. The premium is the price

negotiated and set when the option is bought or sold. A person who buys an option is said to be long in the option. A person who sells (or writes) an option is said to be short in the option.

In India, National Stock Exchange (NSE) became the first exchange to launch trading in options on individual securities. Trading in options on individual securities commenced from July 2, 2001. All stock/index Option contracts are European style and cash settled and are currently available on 5 Indices and 223 securities as stipulated by the Securities and Exchange Board of India (SEBI).

Example using hypothetical figures on Index Options:

Market type: N

Instrument Type: OPTIDX

Underlying: Nifty 50

Purchase date: February 24, 2021

Expiry date: March 24, 2021

Option Type: Put Option (Purchased)

Strike Price: Rs. 6,100.00

Spot Price: Rs. 6,136.00

Premium: Rs. 84.00

Lot Size: 50

No. of Contracts: 100

Say, the Fund purchases on February 24, 2021, 1 month Put Options on Nifty 50 on the NSE i.e. put options on 5000 shares (100 contracts of 50 shares each) of Nifty 50.

Date of Exercise:

As these are European style options, they can be exercised only on the expiry date i.e. March 24, 2021. If the share price of Nifty 50 falls to Rs.5,500 on expiry day, the net impact will be as follows:

Premium expense = Rs.84*100* 50 =Rs. 4,20,000/-

Option Exercised at = Rs. 5,500/-

Profits for the Fund = (6100.00–5,500.00) * 100*50 = Rs. 30,00,000/-

Net Profit = Rs. 30,00,000 – Rs. 4,20,000 = Rs. 25,80,000/-

In the above example, the Investment Manager hedged the market risk on 5,000 shares of Nifty 50 Index by purchasing Put Options.

Please note that the above example is given for illustration purposes only. Some assumptions have been made for the sake of simplicity. Certain factors like margins have been ignored. The purchase of Put Options does not increase the market risk in the fund as the risk is already in the fund's portfolio on account of the underlying asset position. The premium paid for the option is treated as an expense. Additional risks could be on account of illiquidity and potential mis-pricing of the options.

DEBT MARKET & MONEY MARKET IN INDIA

The Indian debt markets are one of the largest such markets in Asia. Government and Public Sector enterprises are predominant borrowers in the market. While interest rates were regulated till a few years back, there has been a rapid deregulation and currently both the lending and deposit rates are market determined.

The debt markets are developing fast, with the rapid introduction of new instruments including Foreign Portfolio Investors are also allowed to invest in Indian debt markets now. There has been a considerable increase in the trading volumes in the market. The trading volumes are largely concentrated in the Government of India Securities, which contribute a significant proportion of the daily trades.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks) and Treasury Bills & Cash Management Bills (issued by RBI). In a predominantly institutional market, the key money market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and corporates.

Following table exhibits various debt instruments along with indicative yields as on January 17, 2025

Instruments	Yield level (% per annum)
G – Sec 5 year	6.72
G – Sec 10 year	6.77
CP’s 3 months	7.60
CD’s 3 months	7.55
CP’s 1 year	7.70
CD’s 1 year	7.65
NBFC	
Corporate Debentures AAA 3 year	7.85
Corporate Debentures AAA 5 year	7.70
PSU	
Corporate Debentures AAA 3 year	7.49
Corporate Debentures AAA 5 year	7.39

The actual yields will, however, vary in line with general levels of interest rates and debt/money market conditions prevailing from time to time.

The mutual fund or AMC and its empanelled brokers have not given and shall not give any indicative portfolio and indicative yield in any communication, in any manner whatsoever. Investors are advised not to rely on any communication regarding indicative yield/ portfolio with regard to the scheme.

PORTFOLIO TURNOVER

Portfolio turnover in the scheme will be a function of market opportunities. It is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. The AMC will endeavor to optimize portfolio turnover to optimize risk adjusted return keeping in mind the cost associated with it. A high portfolio turnover rate is not necessarily a drag on portfolio performance and may be representative of investment opportunities that exist in the market.

Portfolio Turnover ratio of the scheme: - Not applicable, as this is a new scheme

*Portfolio Turnover Ratio is calculated as lower of purchase or sale during the period / Average AUM for the last one year (includes Fixed Income securities and Equity derivatives).

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

The Scheme shall be benchmarked to Nifty Next 50 Index

Since the scheme is an index fund, the compositions of the benchmark are such that it is most suited for comparing performance of the Scheme.

Subject to the Regulations, the AMC may invest in the Scheme during the NFO and/or on ongoing basis. However, the AMC shall not charge any investment management and advisory fee on such investment in the Scheme, in accordance with sub-regulation 17 of Regulation 25 of the Regulations and shall charge fees on such amounts in future only if the SEBI Regulations so permit.

The AMC shall invest in the scheme based on the risk associated with the scheme as specified in para 6.9 of the SEBI Master Circular.

The Scheme may invest in another scheme managed by the same AMC or by the AMC of any other Mutual Fund without charging any fees on such investments, provided that aggregate inter-scheme investment made by all schemes managed by the same AMC or by the AMC of any other Mutual Fund shall not exceed 5% of the net asset value of the Fund. For detailed provisions refer SAI.

PART III- OTHER DETAILS

A. COMPUTATION OF NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date. The Fund shall value its investments according to the valuation norms, as specified in Schedule VIII of the Regulations, or such norms as may be prescribed by SEBI from time to time.

All expenses and incomes accrued up to the valuation date shall be considered for computation of NAV. For this purpose, major expenses like management fees and other periodic expenses would be accrued on a day to day basis. The minor expenses and income will be accrued on a periodic basis, provided the non-daily accrual does not affect the NAV calculations by more than 1%.

Any changes in securities and in the number of units be recorded in the books not later than the first valuation date following the date of transaction. If this is not possible given the frequency of the Net Asset Value disclosure, the recording may be delayed upto a period of seven days following the date of the transaction, provided that as a result of the non-recording, the Net Asset Value calculations shall not be affected by more than 1%.

In case the Net Asset Value of a scheme differs by more than 1%, due to non - recording of the transactions, the investors or scheme/s as the case may be, shall be paid the difference in amount as follows:-

- (i) If the investors are allotted units at a price higher than Net Asset Value or are given a price lower than Net Asset Value at the time of sale of their units, they shall be paid the difference in amount by the scheme.
- (ii) If the investors are charged lower Net Asset Value at the time of purchase of their units or are given higher Net Asset Value at the time of sale of their units, asset management company shall pay the difference in amount to the scheme.

The asset management company may recover the difference from the investors.

NAV of units under the Scheme shall be calculated as shown below:

NAV (Rs.) =

Market or Fair Value of Scheme's investments	+	Current Assets including Accrued Income	-	Current Liabilities and Provisions including accrued expenses
--	---	---	---	---

No. of Units outstanding under Scheme

The NAV of the Scheme will be calculated upto four decimal places and will be declared on each business day. The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and shall be subject to such regulations as may be prescribed by SEBI from time to time.

The Fund will also calculate intra-day indicative NAV (computed based on snapshot prices received from BSE) and will be updated during the market hours on the website of the Mutual Fund (www.bandhanmutual.com) with a delay of approximately 15 seconds. Intra-day indicative NAV will not have any bearing on the creation or redemption of units directly with the Fund by the Authorized Participants /Large Investors.

Illustration:

Computation of NAV - Assume that the Market or Fair Value of Scheme's investments is Rs. 1,00,00,000; Current asset of the scheme is Rs. 25,00,000; Current Liabilities and Provisions is Rs. 15,00,000 and the No.

of Units outstanding under the scheme are 5,00,000. Thus, the NAV will be calculated as:

$$\text{NAV} = \frac{10000000 + 2500000 - 1500000}{500000} = 22.000$$

Therefore, the NAV of the scheme is Rs. 22.000

Computation of Repurchase Price - If the applicable NAV is Rs. 10, exit load is 2% then redemption price will be: Rs. 10* (1-0.02) = Rs. 9.80

The Redemption Price will not be lower than 95% of the NAV

For details on policies related to computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV, please refer SAI.

B. NEW FUND OFFER (NFO) EXPENSES

The New Fund Offer expenses of the scheme will be borne by the AMC.

C. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses for operating the scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below:

The AMC has estimated that upto 1.00% (plus additional expenses as permitted under SEBI Regulations) of the daily net assets of the scheme will be charged to the scheme as expenses.

For the actual current expenses being charged, the investor should refer to the website of the mutual fund.

Expense Head	% p.a. of daily Net Assets* (Estimated p.a.)	
Investment Management & Advisory Fee	Upto 1.00%	
Audit fees/fees and expenses of trustees		
Custodial Fees		
Registrar & Transfer Agent Fees including cost of providing account statements / IDCW / redemption cheques/ warrants		
Marketing & Selling Expenses including Agents Commission and statutory advertisement		
Costs related to investor communications		
Costs of fund transfer from location to location		
Cost towards investor education & awareness (shall be 1 bps)		
Brokerage & transaction cost pertaining to distribution of units		
Goods & Services Tax on expenses other than investment and advisory fees		
Goods & Services Tax on brokerage and transaction cost		
Other Expenses (to be specified as per Reg 52 of SEBI MF Regulations)		
Maximum Total expenses ratio (TER) permissible under Regulation 52 (6) (b)		Upto 1.00%
Additional expenses under regulation 52 (6A) (c)		Upto 0.05%
Additional expenses for gross new inflows from specified cities	Upto 0.30%	

In line with clause 10.1.16.a of SEBI Master Circular, the AMC / Mutual Fund shall annually set apart shall be 1 basis points (i.e. 0.01%) on daily net assets of the scheme within the maximum limit of Total

Expense Ratio as per Regulation 52 of the SEBI (MF) Regulations for investor education and awareness initiatives.

Brokerage and transaction costs (inclusive of GST) which are incurred for the purpose of execution of trades, shall be charged to the scheme as per Regulation 52(6A)(a) of SEBI (Mutual Funds) Regulations, 1996 not exceeding 0.12 per cent in case of cash market transactions and 0.05 per cent in case of derivatives transactions. With effect from April 1, 2023, to align with Indian Accounting Standards requirement, transactions cost incurred for the purpose of execution of trades are expensed out (viz. charged to Revenue Account instead of Capitalization (i.e. forming part of cost of investment)). Any payment towards brokerage and transaction cost, over and above the said 0.12 percent and 0.05 percent for cash market transactions and derivatives transactions respectively may be charged to the scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

The expense of 30 bps shall be charged if the new inflows from retail investors from B30 cities as specified from time to time are at least -

(i) 30 per cent of gross new inflows from retail investors in the scheme, or; (ii) 15 per cent of the average assets under management (year to date) of the scheme, whichever is higher:

Provided that if inflows from retail investors from B30 cities is less than the higher of sub-clause (i) or sub-clause (ii), such expenses on daily net assets of the scheme shall be charged on proportionate basis.

Provided further that expenses charged under this clause shall be utilized for distribution expenses incurred for bringing inflows from retail investors from B30 cities. Provided further that amount incurred as expense on account of inflows from retail investors from B30 cities shall be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment.

In case inflows from retail investors from beyond top 30 cities is less than the higher of (i) or (ii) above, additional TER on daily net assets of the scheme shall be charged as follows:

$$\frac{\text{Daily net assets X 30 basis points X New inflows from individuals beyond top 30 cities}}{\text{365* X Higher of (i) or (ii) above}}$$

* 366, wherever applicable.

For the above purposes, 'B30 cities' shall be beyond Top 30 cities as at the end of previous financial year as communicated by AMFI. Retail investors would mean individual investors from whom inflows into the Scheme would amount upto Rs. 2,00,000/- per transaction.

Note: SEBI vide its letter no. SEBI/HO/IMD-SEC-3/P/OW/2023/5823/1 dated February 24, 2023 and AMFI letter dated No. 35P/ MEM-COR/ 85-a/ 2022-23 dated March 02, 2023 has directed AMCs to keep B-30 incentive structure in abeyance with effect from March 01, 2023 till further notice

Direct Plan shall have a lower expense ratio excluding distribution expenses, commission, etc and no commission for distribution of Units will be paid / charged under Direct Plan. All fees and expenses charged in a direct plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under such heads in a Regular Plan.

The AMC shall adhere provisions of Chapter 10 of SEBI Master Circular and various guidelines specified by SEBI as amended from time to time, with reference to charging of fees and expenses. Accordingly:

- a. All scheme related expenses including commission paid to distributors, shall be paid from the Scheme only within the regulatory limits and not from the books of the AMC, its associates,

sponsor, trustee or any other entity through any route.

Provided that, such expenses that are not specifically covered in terms of Regulation 52 (4) can be paid out of AMC books at actual or not exceeding 2 bps of the Scheme AUM, whichever is lower.

- b. The Fund / the AMC shall adopt full trail model of commission in the Scheme, without payment of any upfront commission or upfronting of any trail commission, directly or indirectly, in cash or kind, through sponsorships, or any other route.
- c. All fees and expenses charged in a Direct Plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under such heads in Regular Plan.
- d. No pass back, either directly or indirectly, shall be given by the Fund / the AMC / Distributors to the investors.

Disclosure on Goods & Services Tax:

Goods & Services Tax on investment management and advisory fees shall be in addition to the above expense. Further, with respect to Goods & Services Tax on other than management and advisory fees:

- Goods & Services Tax on other than investment and advisory fees, if any, shall be borne by the scheme within the maximum limit of TER as per regulation 52 of the Regulations.
- Goods & Services Tax on exit load, if any, shall be paid out of the exit load proceeds and exit load net of Goods & Services Tax, if any, shall be credited to the scheme.
- Goods & Services Tax on brokerage and transaction cost paid for asset purchases, if any, shall be within the limit prescribed under regulation 52 of the Regulations.

For the actual current expenses being charged to the Scheme, the investor should refer to the website of the mutual fund at www.bandhanmutual.com (Home>Total Expense Ratio of Mutual Fund Schemes). Any change proposed to the current expense ratio will be updated on the website at least three working days prior to the change.

As per the Regulations, the total recurring expenses that can be charged to the Scheme in this Scheme information document shall be subject to the applicable guidelines. The total recurring expenses of the Scheme, will, however, be limited to the ceilings as prescribed under Regulation 52(6) of the Regulations.

D. LOAD STRUCTURE

Exit Load is an amount which is paid by the investor to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (www.Bandhanmutual.com) or may call at (toll free no.1-800-2666688/ 1-800-2666688.) or your distributor.

Type of Load	Load chargeable (as %age of NAV)
Exit	0.25% if redeemed on or before 15 days from the allotment date. Nil if redeemed after 15 days from the allotment date

Switches of following kind within the Scheme will also not attract any exit load - (i) switch from Direct Plan to Regular Plan; (ii) switch from Regular Plan to Direct Plan where the investment in Regular Plan is without a Distributor (ARN) code.

B. Risk factors

Scheme specific risk factors

The Scheme attempts to track the respective indices and it would invest in the securities included in its Underlying indices regardless of their investment merit. The Scheme may be affected by a general decline in the Indian markets.

- The performance of the Nifty Next 50 Index will have a direct bearing on the performance of the scheme. In the event the Nifty Next 50 Index is dissolved or is withdrawn by NSE Indices Limited (NSEIL) or is not published due to any reason whatsoever, the Trustee reserves the right to modify the respective scheme to track a different and suitable index or to suspend tracking the Nifty Next 50 Index till such time it is dissolved/withdrawn or not published and appropriate intimation will be sent to the Unit holders of the scheme. In such a case, the investment pattern will be modified suitably to match the composition of the securities that are included in the new index to be tracked and the scheme will be subject to tracking errors during the intervening period.

- Tracking errors are inherent in any index fund, and such errors may cause the scheme to generate returns that are not in line with the performance of the Nifty Next 50 Index or one or more securities covered by / included in the Nifty Next 50 Index and may arise from a variety of factors including but not limited to, any delay in the purchase or sale of shares due to illiquidity in the market, settlement, and realization of sales proceeds, delay in credit of securities or in receipt and consequent reinvestment of Income Distribution cum capital withdrawal, etc.

- The Indices reflect the prices of securities at a point in time, which is the price at close of business day on National Stock Exchange of India Limited (NSE). The scheme however, may trade these securities at different points in time during the trading session and therefore the prices at which the scheme trade may not be identical to the closing price of each scrip on that day on the NSE. In addition, the scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance, from NSE closing prices.

- NSEIL undertakes periodic reviews of the securities that are represented in the Nifty Next 50 Index and from time to time may exclude existing securities or include new ones. In such an event, the scheme will endeavor to reallocate its portfolio to mirror the changes. However, the reallocation process may not occur instantaneously and permit precise mirroring of the Nifty Next 50 Index during this period.

- The potential of trades to fail may result in the scheme not having acquired the security at the price necessary to mirror the index.

- Transaction and other expenses, such as but not limited to brokerage, custody, trustee and investment management fees.

- Being an open-ended scheme, the scheme may hold appropriate levels of cash or cash equivalents to meet ongoing redemptions. The scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to, circuit filters in the securities, liquidity, and volatility in security prices.

- Due to the reasons mentioned above and other reasons that may arise, it is expected that the scheme may have a tracking error in the range of 2% per annum from the Benchmark. However, it needs to be clearly understood that the actual tracking error can be higher or lower than the range given.

- In the case of investments in derivatives like index futures, the risk-reward would be the same as investments in a portfolio of shares representing an index. However, there may be a cost attached to buying an index future. Further, there could be an element of settlement risk, which could be different from the risk in settling physical shares, and there is a risk attached to the liquidity and the depth of the index futures market as it is a relatively new market.

- Price-Risk or Interest-Rate Risk: Fixed-income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed-income securities fall, and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity, and the increase or decrease in the level of interest rates.

- Credit Risk: In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme(s) has invested in Government Securities, there is no credit risk to that extent. Different types of securities in which the scheme(s) would invest as given in the scheme information document carry different levels and types of risk. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.

- Re-investment Risk: Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

- Basis Risk (Interest-rate movement): During the life of a floating rate security or a swap, the underlying benchmark index may become less active and may not capture the actual movement in interest rates, or at times, the benchmark may cease to exist. These types of events may result in loss of value in the portfolio.

- Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However, depending upon the market conditions, the spreads may move adversely or favorably leading to fluctuation in the NAV.

- Liquidity Risk: Due to the evolving nature of the floating rate market, there may be an increased risk of liquidity risk in the portfolio from time to time.

- Other Risk: In case of downward movement of interest rates, floating rate debt instruments will give a lower return than fixed rate debt instruments.

Risk Associated with Investing in Equities

- a. Investments in the equity shares of the Companies constituting the Underlying Index are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macro-economic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.

b. The Scheme would invest in the securities comprising the Underlying Index in the same proportion as the securities have in the Index. Hence, the risk associated with the corresponding Underlying Index would be applicable to the Scheme. The Underlying Index has its own criteria and policy for inclusion/exclusion of securities from the Index, its maintenance thereof and effecting corporate actions. The Fund would invest in the securities of the Index regardless of investment merit, research, without taking a view of the market and without adopting any defensive measures. The Fund would not select securities in which it wants to invest but is guided by the Underlying Index. As such the Scheme is not actively managed but is passively managed.

c. Risks of Total Return - Dividends are assumed to be reinvested into the Nifty Next 50 Index Fund TRI after the ex-dividend date of the constituents. However, in practice, the dividend is received with a lag. This can lead to some tracking error.

Market Risk

The Scheme's NAV will react to stock market movements. The value of investments in the scheme may go down over a short or long period due to fluctuations in Scheme's NAV in response to factors such as the performance of companies whose stock comprises the underlying portfolio, economic and political developments, changes in government policies, changes in interest rates, inflation and other monetary factors causing movement in prices of underlying investments.

Concentration risk

This is the risk arising from over exposure to few securities/issuers/sectors.

Passive Investments

The Scheme is not actively managed. Since the Scheme is linked to index, it may be affected by a general decline in the Indian markets relating to its underlying index. The Scheme as per its investment objective invests in Securities which are constituents of its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.

Right to Limit Redemptions

The Trustee, in the general interest of the unit holders of the Scheme offered under this SID and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day subject to the guidelines/circulars issued by the Regulatory Authorities from time to time.

Risk Factors relating to Portfolio Rebalancing

In the event that the asset allocation of the Scheme deviates from the ranges as provided in the asset allocation table in this SID, then the Fund Manager will rebalance the portfolio of the Scheme to the position indicated in the asset allocation table.

Risk Associated with Index Fund

The Scheme, being an index scheme follows a passive investment technique and shall only invest in Securities comprising one selected index as per the investment objective of the Scheme. The Fund Manager would invest in the Securities comprising the underlying index irrespective of the market conditions. If the Securities market declines, the value of the investment held by the Scheme shall decrease.

Risks associated with Debt and Money Market instruments.

a) **Credit Risk:** Securities carry a Credit risk of repayment of principal or interest by the borrower. This risk depends on micro-economic factors such as financial soundness and ability of the borrower as also macroeconomic factors such as Industry performance, Competition from Imports, Competitiveness of Exports, Input costs, Trade barriers, Favorability of Foreign Currency conversion rates, etc. Credit risks of most issuers of Debt securities are rated by Independent and professionally run rating agencies. Ratings of Credit issued by these agencies typically range from "AAA" (read as "Triple A" denoting "Highest Safety") to "D" (denoting "Default"), with about 6 distinct ratings between the two extremes. The highest credit rating (i.e. lowest credit risk) commands a low yield for the borrower. Conversely, the lowest credit rated borrower can raise funds at a relatively higher cost. On account of a higher credit risk for lower rated borrowers' lenders prefer higher rated instruments further justifying the lower yields.

b) **Price-Risk or Interest-Rate Risk:** From the perspective of coupon rates, Debt securities can be classified in two categories, i.e., Fixed Income bearing Securities and Floating Rate Securities. In Fixed Income Bearing Securities, the Coupon rate is determined at the time of investment and paid/received at the predetermined frequency. In the Floating Rate Securities, on the other hand, the coupon rate changes - 'floats' - with the underlying benchmark rate, e.g., MIBOR, 1 yr. Treasury Bill. Fixed Income Securities (such as Government Securities, bonds, debentures and money market instruments) where a fixed return is offered, run price-risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, the payment-frequency of such coupon, days to maturity and the increase or decrease in the level of interest rates. The prices of Government Securities (existing and new) will be influenced only by movement in interest rates in the financial system. Whereas, in the case of corporate or institutional fixed income securities, such as bonds or debentures, prices are influenced not only by the change in interest rates but also by credit rating of the security and liquidity thereof. However, debt securities in the scheme are intended to be held till 13 maturity. For such securities held till maturity, there will not be any interest rate risk at the end of the tenure. Floating rate securities issued by a government (coupon linked to treasury bill benchmark or a real return inflation linked bond) have the least sensitivity to interest rate movements, as compared to other securities. The Government of India has already issued a few such securities and the Investment Manager believes that such securities may become available in future as well. These securities can play an important role in minimizing interest rate risk on a portfolio.

c) **Risk of Rating Migration:** The following table illustrates the impact of change of rating (credit worthiness) on the price of a hypothetical AA rated security with a maturity period of 3 years, a coupon of 10.00% p.a. and a market value of Rs. 100. If it is downgraded to A category, which commands a market yield of, say, 11.00% p.a., its market value would drop to Rs. 97.53 (i.e. 2.47%) If the security is up-graded to AAA category which commands a market yield of, say, 9.00% p.a. its market value would increase to Rs102.51 (i.e. by 2.51%). The figures shown in the table are only indicative and are intended to demonstrate how the price of a security can be affected by change in credit rating.

Rating	Yield (% p.a.)	Market Value (Rs.)
AA	10.00	100.00
If upgraded to AAA	9.00	102.51
If downgraded to A	11.00	97.53

d) **Basis Risk:** During the life of floating rate security or a swap the underlying benchmark index may become less active and may not capture the actual movement in the interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio. Where swaps are used to hedge an underlying fixed income security, basis risk could arise when the fixed income yield curve moves differently from that of the swap benchmark curve.

e) **Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However, depending upon the market conditions the spreads may move adversely or favourably leading to fluctuation in NAV.

f) Reinvestment Risk: Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

g) Liquidity Risk: The corporate debt market is relatively illiquid vis-a- vis the government securities market. There could therefore be difficulties in exiting from corporate bonds in times of uncertainties. Liquidity in a scheme therefore may suffer. Even though the Government Securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through. In view of this, redemption may be limited or suspended after approval from the Boards of Directors of the AMC and the Trustee.

Risk factors with investing in Derivatives

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. As and when the Scheme trade in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand.

Derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counter party”) to comply with the terms of the derivatives contract.

The specific risk factors arising out of a derivative strategy used by the Fund Manager may be as below:

Lack of opportunity available in the market;

The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Tracking Error Risk:

The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the scheme, corporate actions, cash balance, changes to the underlying index, non-availability of issuances, regulatory policies and any such reasons that may affect AMC’s ability to achieve close correlation with the underlying index of the scheme. The scheme’s returns may therefore deviate from those of its underlying index. “Tracking Difference” is the difference of return between the fund and its respective benchmark. “Tracking Error” is defined as the standard deviation of the difference between daily

returns of the underlying index and the NAV of the respective scheme. Tracking difference /Tracking Error may arise including but not limited to the following reasons: -

- i) Expenditure incurred by the fund.
- ii) The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses. The fund may not be invested at all time as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.
- iii) Securities trading may halt temporarily due to circuit filters.
- iv) Corporate actions such as debenture or warrant conversion, merger, change in constituents etc.
- v) Disinvestments to meet redemptions, recurring expenses, etc.
- vi) Execution of large buy / sell orders
- vii) Transaction cost (including taxes and insurance premium) and recurring expenses
- viii) Realisation of Unit holders' funds.

It will be the endeavor of the fund manager to keep the tracking error as low as possible. Under normal circumstances, such tracking error is not expected to exceed 2% per annum. However, in certain events like market volatility during rebalancing of the portfolio following the rebalancing of the underlying index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any. The Fund existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data.

Risks specific to investing in securities forming part of the Nifty Next 50 Index : -

The Nifty Next 50 Index represents 50 companies from Nifty 100 after excluding the Nifty 50 companies. Nifty Next 50 is computed using free float market capitalization method wherein the level of the index reflects total free float market value of all the stocks in the index relative to a particular base market capitalization value. Additionally, the underlying scheme is mandated to invest in securities from the Nifty Next 50 Index, comprising 50 constituents, exposing it to risks associated with this selection.

Risks associated with segregated portfolio:

- i. Liquidity risk – A segregated portfolio is created when a credit event / default occurs at an issuer level in the scheme. This may reduce the liquidity of the security issued by the said issuer, as demand for this security may reduce. This is also further accentuated by the lack of secondary market liquidity for corporate papers in India. As per SEBI norms, the scheme is to be closed for redemption and subscriptions until the segregated portfolio is created, running the risk of investors being unable to redeem their investments. However, it may be noted that, the proposed segregated portfolio is required to be formed within one day from the occurrence of the credit event.

Investors may note that no redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolio, AMC shall list the units of the segregated portfolio on a recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests. For the units

listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units. There is no assurance that an active secondary market will develop for units of segregated portfolio listed on the stock exchange. This could limit the ability of the investors to resell them.

ii. Valuation risk - The valuation of the securities in the segregated portfolio is required to be carried out in line with the applicable SEBI guidelines. However, it may be difficult to ascertain the fair value of the securities due to absence of an active secondary market and difficulty to price in qualitative factors.

Risks associated with investing in Government of India Securities

a. Market Liquidity risk with fixed rate Government of India Securities even though the Government of India Securities market is more liquid compared to other debt instruments, on certain occasions, there could be difficulties in transacting in the market due to extreme volatility leading to constriction in market volumes. Also, the liquidity of the Scheme may suffer in case the relevant guidelines issued by Reserve Bank of India undergo any adverse changes.

b. Interest Rate risk associated with Government of India Securities - while Government of India Securities generally carry relatively minimal credit risk since they are issued by the Government of India, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price-risk is not unique to Government of India Securities. It exists for all fixed income securities. Therefore, their prices tend to be influenced more by movement in interest rates in the financial system than by changes in the government's credit rating. By contrast, in the case of corporate or institutional fixed income Securities, such as bonds or debentures, prices are influenced by their respective credit standing as well as the general level of interest rates.

Risks associated with investing in TREPS Segments

The mutual fund is a member of securities and TREPS segments of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in TREPS segments are settled centrally through the infrastructure and settlement systems provided by CCIL; thus, reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time. In the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund allocated to the scheme on a pro-rata basis.

Risk associated with Securities Lending: Engaging in securities lending is subject to risks related to fluctuations in collateral value and settlement/liquidity and counter party risks. The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

Risk associated with Short-selling of Securities: Purchasing a security entails the risk of the security price going down. Short selling of securities (i.e. sale of securities without owning them) entails the risk of the security price going up there by decreasing the profitability of the short position. Short selling is subject to risks related to fluctuations in market price, and settlement/liquidity risks. If required by the Regulations, short selling may entail margin money to be deposited with the clearing house and daily mark to market of the prices and margins. This may impact fund pricing and may induce liquidity risks if the fund is not able to provide adequate margins to the clearing house. Failure to meet margin requirements may result in penalties being imposed by the exchanges and clearing house.

Risk associated with potential change in Tax structure

This summary of tax implications given in the taxation section (Units and Offer Section III) is based on the current provisions of the applicable tax laws. This information is provided for general purpose only. The current taxation laws may change due to change in the ‘Income Tax Act 1961’ or any subsequent changes/amendments in Finance Act/Rules/Regulations. Any change may entail a higher outgo to the scheme or to the investors by way of securities transaction taxes, fees, taxes etc. thus adversely impacting the scheme and its returns

RISK MANAGEMENT STRATEGIES

The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in debt and equity markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Fund has identified following risks of investing in equity and debt and designed risk management strategies, which are embedded in the investment process to manage such risks.

Risks associated with Equity investment

Risk Description	Risk Mitigants/management strategy
<p>Market Risk The scheme is vulnerable to movements in the prices of securities invested by the scheme, which could have a material bearing on the overall returns from the scheme. The value of the Scheme’s investments, may be affected generally by factors affecting securities markets, such as price and volume, volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets.</p>	<p>Market risk is inherent to an equity scheme. Being a passively managed scheme, it will invest in the securities included in its Underlying Index.</p>
<p>Liquidity risk The liquidity of the Scheme’s investments is inherently restricted by trading volumes in the securities in which it invests.</p>	<p>Stocks in the underlying index are primarily selected on the basis of market capitalization by the index provider. The index is rebalanced based on the frequency and methodology specified, and liquid stocks replace certain illiquid stocks. The Fund Manager shall makes the changes to the portfolio accordingly.</p>
<p>Derivatives Risk As and when the Scheme trades in the derivatives</p>	<p>Derivatives will be used in the form of Index Options, Index Futures and other instruments as</p>

All derivatives trade will be done only on the exchange with guaranteed settlement. The AMC monitors the portfolio and regulatory limits for derivatives through its front office monitoring system. Exposure to derivatives of stocks or underlying index will be done based on requisite research. Exposure with respect to derivatives shall be in line with regulatory limits and the limits specified in the SID. No OTC contracts will be entered into.</p>
<p>Tracking Error risk (Volatility/ Concentration risk) The performance of the Scheme may not commensurate with the performance of the underlying Index viz. Nifty Next 50 Index on any given day or over any given period.</p>	<p>Tracking Error risk (Volatility/ Concentration risk) Over a short to medium period, the Scheme may carry the risk of variance between portfolio composition and Benchmark. The objectives of the scheme are to closely track the performance of the Underlying Index over the same period, subject to tracking error. The Scheme would endeavor to maintain a low tracking error by actively aligning the portfolio in line with the Index.</p>

Risks associated with debt and money market investment

Risk Description	Risk Mitigants/management strategy
<p>Market Risk / Interest Rate Risk As with all fixed income securities, changes in interest rates may affect the Scheme’s Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.</p>	<p>The Scheme may invest in debt and money market instruments having relatively shorter maturity thereby mitigating the price volatility due to interest rate changes generally associated with long-term securities.</p>
<p>Liquidity risk or Marketability Risk This refers to the ease with which a security can be sold at or near to its valuation yield- to maturity (YTM).</p>	<p>The Scheme may invest in debt and money market instruments having relatively shorter maturity. While the liquidity risk for short maturity securities may be low, it may be high in case of medium to long maturity securities.</p>

Risk Description	Risk Mitigants/management strategy
<p>Credit Risk Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security).</p>	<p>Management analysis may be used for identifying company specific risks. Management's past track record may also be studied. Preference will be towards high quality instruments.</p>
<p>Reinvestment Risk This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.</p>	<p>Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value.</p>

II. Information about the scheme:

A. Where will the scheme invest

The corpus of the Scheme will be invested in equity and equity related products & in debt and money market instruments. Subject to the Regulations, the corpus of the Scheme can be invested in any (but not exclusively) of the following securities / instruments:

1. Equity and Equity related instruments belonging to Nifty Next 50 Index.
2. Equity Derivatives
3. Debt securities and money market instruments including G-Sec/T-Bills/Cash Management Bills and TREPS
4. Certificate of Deposits (CDs).
5. Commercial Paper (CPs).
6. Other Mutual Funds
7. Any other securities / instruments as may be permitted by SEBI from time to time, subject to regulatory approvals if any.

The securities mentioned above could be listed, privately placed, secured, unsecured and of any maturity. The securities may be acquired through secondary market operations, private placement, rights offers or negotiated deals.

Pending deployment of funds of the Scheme in securities in terms of the investment objective of the Scheme, the AMC may park the funds of the Scheme in short term deposits of scheduled commercial banks, subject to the guidelines mentioned under clause 12.16 of SEBI Master Circular. The AMC shall not charge any investment management and advisory fees for parking of funds in such short term deposits of scheduled commercial banks for the scheme.

The Scheme may participate in securities lending as permitted under the Regulations, from time to time.

Detailed definition and applicable regulations/guidelines for each instrument is included in Section II.

A broad description of various securities:

Equity and Equity-Related Instruments:

1. Equity share is a security that represents an ownership interest in a company. It is issued to those who have contributed capital in setting up an enterprise.
2. Equity Related Instruments are securities that give the holder of the security right to receive equity

shares on pre agreed terms. It includes convertible debentures, convertible preference shares, warrants carrying the right to obtain equity shares, equity derivatives and such other instruments as may be specified by the Board from time to time.

3. Equity Derivatives are financial instruments, generally traded on an exchange, the price of which is directly dependent upon (i.e. “derived from”) the value of equity shares or equity indices. Derivatives involve the trading of rights or obligations based on the underlying, but do not directly transfer property.
4. Derivatives:
Futures are exchange-traded contracts to sell or buy financial instruments for future delivery at an agreed price. There is an agreement to buy or sell a specified quantity of financial instruments on a designated future date at a price agreed upon by the buyer and seller at the time of entering into a contract. To make trading possible, the exchange specifies certain standardized features of the contract. A futures contract involves an obligation on both the parties to fulfill the terms of the contract.
 - a. Option is a contract which provides the buyer of the option (also called holder) the right, without the obligation, to buy or sell a specified asset at the agreed price on or upto a particular date. For acquiring this privilege, the buyer pays premium (fee) to the seller. The seller on the other hand has the obligation to buy or sell specified assets at the agreed price and for this obligation he receives premium. The premium is determined considering a number of factors such as the market price of the underlying asset/security, number of days to expiry, risk free rate of return, strike price of the option and the volatility of the underlying asset. Option contracts are of two types viz:
 - b. Call Option - The option that gives the buyer the right to buy a specified quantity of the underlying asset at the strike price is a call option. The buyer of the call option (known as the holder of call option) can call upon the seller of the option (writer of the option) and buy from him the underlying asset at the agreed price at any time on or before the expiry of the option.

The seller (writer of the option) on the other hand has the obligation to sell the underlying asset if the buyer of the call option decides to exercise his option to buy.

- c. Put Option - The right to sell is called put option. A Put option gives the holder (buyer) the right to sell a specified quantity of the underlying asset at the strike price. The seller of the put option (one who is short Put) however, has the obligation to buy the underlying asset at the strike price if the buyer decides to exercise his option to sell.

Debt Instruments:

- 1) Non-convertible debentures as well as bonds are securities issued by companies / institutions promoted / owned by the Central or State governments and statutory bodies, which may or may not carry a Central/State government guarantee, public and private sector banks, All India Financial Institutions, private sector companies. These instruments may be secured against the assets of the company or unsecured and generally issued to meet the short term and long term fund requirements. Rate of interest on such instruments would depend upon spread over corresponding government security, perceived risk, rating, tenor etc. These instruments include fixed interest security with/without put/call option, floating rate bonds, zero coupon bonds. Frequency of the interest payment could be either monthly/quarterly/half-yearly or annually.
- 2) Securities created and issued by the Central and State Governments as may be permitted by RBI, securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills). Special securities issued by the Government of India to entities like Oil Marketing Companies, Fertilizer Companies, the Food Corporation of India, etc. (popularly called oil bonds, fertilizer bonds and food bonds respectively) and special

securities issued by the State Government under “Ujjwal Discom Assurance Yojna (UDAY) Scheme for Operational and Financial Turnaround of Power Distribution Companies (DISCOMs)” notified by Ministry of Power vide Office Memorandum (No 06/02/2015-NEF/FRP) dated November 20, 2015, (popularly called as UDAY Bonds). Central Government Securities are sovereign debt obligations of the Government of India with zero-risk of default and issued on its behalf by RBI. They form part of Government’s annual borrowing programme and are used to fund the fiscal deficit along with other short term and long term requirements. Such securities could be fixed rate, fixed interest rate with put/call option, zero coupon bond, floating rate bonds, capital indexed bonds, fixed interest security with staggered maturity payment etc.

Money Market Instruments:

- 1) Certificate of Deposits (CDs) is a negotiable money market instrument issued by scheduled commercial banks and select all-India Financial Institutions that have been permitted by the RBI to raise short term resources. The maturity period of CDs issued by the Banks is between 7 days to one year whereas in case of FIs, maturity is between one year to 3 years from the date of issue. CDs may be issued at a discount to face value. Banks/ FIs cannot buyback their own CDs before maturity.
- 2) Commercial Paper (CPs) is an unsecured negotiable money market instrument issued in the form of a promissory note, generally issued by the corporates, primary dealers and all India Financial Institutions as an alternative source of short-term borrowings. They are issued at a discount to the face value as may be determined by the issuer. CP is traded in the secondary market and can be freely bought and sold before maturity.
- 3) Treasury Bills (T-Bills) are issued by the Government of India to meet their short-term borrowing requirements. T-Bills are issued for maturities of 91 days, 182 days and 364 days. T-bills are issued at a discount to their face value and redeemed at par.
- 4) Non-Convertible Debentures of original or initial maturity upto one year issued by corporate (including NBFCs) by way of private placement in accordance with the provisions of master circular of RBI vide reference no. RBI/MRD/2016-17/32 dated July 7, 2016.
- 5) Tri-party Repo means a repo contract where a third entity (apart from the borrower and lender), called a Tri-Party Agent, acts as an intermediary between the two parties to the repo to facilitate services like collateral selection, payment and settlement, custody and management during the life of the transaction.
- 6) Repo (Repurchase Agreement) or Reverse Repo is a transaction in which two parties agree to sell and purchase the same security with an agreement to purchase or sell the same security at a mutually decided future date and price. The transaction results in collateralized borrowing or lending of funds. When the seller sells the security with an agreement to repurchase it, it is a Repo transaction whereas from the perspective of buyer who buys the security with an agreement to sell it at a later date, it is reverse repo transaction. Presently in India, G-Secs, State Government Securities, T-Bills and Corporate Debt Securities are eligible for Repo/Reverse Repo.
- 7) Bills Rediscounting- Bills Rediscounting. Bill rediscounting is a process where a financial institution (generally banks) discounts the bills of exchange that it has discounted previously with another financial institution. In other words, the original discounting bank sells its discounted bills to another bank or financial institution at a discount. The new institution pays the original institution the present value of the bills minus a discount, and in return, it becomes the holder of the bills until maturity, when it receives the full payment from the debtor. Bill rediscounting is a way for financial institutions to manage their liquidity and meet short-term funding requirements.

- 8) Cash Management Bills (CMB) are issued by Government of India to meet the temporary cash flow mismatches of the Government. CMBs are non-standard, discounted instruments issued for maturities less than 91 days. CMBs are issued at discount to the face value through auctions. The settlement of the auction will be on T+1 basis.

- 6) Transfer of investments from one Scheme to another Scheme in the same Mutual Fund is permitted provided:
 - i. such transfers are done at the prevailing market price for quoted instruments on spot basis and in line provisions under clause 12.30 of SEBI Master Circular and as may be specified by SEBI from time to time, in this regard; and
 - ii. the securities so transferred shall be in conformity with the investment objective of the Scheme to which such transfer has been made.
 - iii. the same are in line with clause 12.30 of SEBI Master Circular.
- 7) The Scheme may invest in other Schemes under the same AMC or any other Mutual Fund without charging any fees, provided the aggregate inter-Scheme investment made by all the Schemes under the same management or in Schemes under management of any other asset management company shall not exceed 5% of the Net Asset Value of the Fund. Provided that this clause shall not apply to any Fund of Funds scheme.
- 8) The Fund shall get the securities purchased transferred in the name of the Fund on account of the concerned Scheme, wherever investments are intended to be of a long-term nature.
- 9) All the Scheme's investments will be in transferable securities.
- 10) No loans for any purpose can be advanced by the Scheme.
- 11) The Fund shall not borrow except to meet temporary liquidity needs of the Fund for the purpose of repurchase/ redemption of units or payment of interest and/or IDCW to the Unitholder's, provided that the Fund shall not borrow more than 20% of the net assets of the individual Scheme and the duration of the borrowing shall not exceed a period of 6 months.
- 12) Pending deployment of the funds of the Scheme in securities in terms of the investment objective of the Scheme, the AMC may park the funds of the Scheme in short term deposits of scheduled commercial banks, subject to the guidelines issued by SEBI from time to time. currently, the following guidelines/restrictions are applicable for parking of funds in short term deposits:
 - "Short Term" for such parking of funds by the Scheme shall be treated as a period not exceeding 91 days.
 - Such short-term deposits shall be held in the name of the Scheme.
 - The Scheme shall not park more than 15% of the net assets in short term deposit(s) of all the scheduled commercial banks put together. However, such limit may be raised to 20% with prior approval of the Trustee.
 - Parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the Mutual Fund in short term deposits.
 - The Scheme shall not park more than 10% of the net assets in short term deposit(s), with any one scheduled commercial bank including its subsidiaries.
 - The Scheme shall not park funds in short term deposit of a bank which has invested in that Scheme. The Trustees / AMCs shall ensure that the bank in which the Scheme has short term deposit do not invest in the Scheme until the Scheme has STD with such bank.
 - The AMC shall not charge any investment management and advisory fees for parking of funds in short term deposits of scheduled commercial banks.

However, the above provisions will not apply to term deposits placed as margins for trading in

cash and Derivatives market.

- 13) The Scheme will comply with provisions specified in clause 12.25 of SEBI Master Circular related to overall exposure limits applicable for derivative transactions as stated below:
- (a) The cumulative gross exposure through equity, debt, derivative positions and across various other asset classes in which the Scheme is permitted to invest should not exceed 100% of net assets of the Scheme.

For allotment in demat form the account statement shall be sent by the depository / depository participant, and not by the AMC. • For NFO allotment in demat form, the AMC shall issue units in dematerialized form to a unit holder within two working days of the receipt of request from the unit holder. • For those unitholders who have provided an e-mail address, the AMC will send the account statement by e-mail instead of physical statement. • The unitholder may request for an account statement by writing / calling us at any of the ISC and the AMC shall provide the account statement to the investor within 5 business days from the receipt of such request. <p>Pursuant to clause 14.4 of SEBI Master Circular, investors are requested to note the following regarding dispatch of account statements:</p> <p>A) Consolidated Account Statement (CAS) - for Unitholders who have registered their PAN / PEKRN with the Mutual Fund:</p> <p><u>Investors who hold demat account and have registered their PAN with the mutual fund:</u></p> <p>For transactions in the schemes of Bandhan Mutual Fund, a Consolidated Account Statement, based on PAN of the holders, shall be sent by Depositories to investors holding demat account, for each calendar month on or before fifteenth day of the succeeding month to the investors in whose folios transactions have taken place during that month.</p> <p>Due to this regulatory change, AMC has now ceased sending account statement (physical / e-mail) to the investors after every financial transaction including systematic transactions.</p> <p>The CAS shall be generated on a monthly basis. AMCs/ RTAs shall share the requisite information with the Depositories on monthly basis to enable generation of CAS. Consolidation of account statement shall be done on the basis of PAN. In case of multiple holding, it shall be the PAN of the first holder and pattern of holding. Based on the PANs provided by the AMCs/MF-RTAs, the Depositories shall match their PAN database to determine the common PANs and allocate the PANs among themselves for the purpose of sending CAS. For PANs which are common between depositories and AMCs, the Depositories shall send the CAS.</p> <p>In case investors have multiple accounts across the two depositories, the depository having the demat account which has been opened</p>

earlier shall be the default depository which will consolidate details across depositories and MF investments and dispatch the CAS to the investor. However, option shall be given to the demat account holder by the default depository to choose the depository through which the investor wishes to receive the CAS.

In case of demat accounts with nil balance and no transactions in securities and in mutual fund folios, the depository shall send the account statement to the investor as specified under the regulations applicable to the depositories.

Consolidated account statement sent by Depositories is a statement containing details relating to all financial transactions made by an investor across all mutual funds viz. purchase, redemption, switch, Payout of IDCW option, Reinvestment of IDCW option, systematic investment plan, systematic withdrawal plan, systematic transfer plan, bonus etc. (including transaction charges paid to the distributor) and transaction in dematerialised securities across demat accounts of the investors and holding at the end of the month. The CAS shall also provide the total purchase value / cost of investment in each scheme.

Further, a consolidated account statement shall be sent by Depositories every half yearly (September/March), on or before twenty first day of succeeding month.

Such half-yearly CAS shall be issued to all MF investors, excluding those investors who do not have any holdings in MF schemes and where no commission against their investment has been paid to distributors, during the concerned half-year period.

Investors whose folio(s)/demat account(s) are not updated with PAN shall not receive CAS. Investors are therefore requested to ensure that their folio(s)/demat account(s) are updated with PAN.

For Unit Holders who have provided an e-mail address to the Mutual Fund or in KYC records, the CAS will be sent by e-mail. However, where an investor does not wish to receive CAS through email, option shall be given to the investor to receive the CAS in physical form at the address registered in the Depository system.

Investors who do not wish to receive CAS sent by depositories have an option to indicate their negative consent. Such investors may contact the depositories to opt out.

Other investors:

The Consolidated Account Statement (CAS) for each calendar month shall be issued on or before fifteenth day of succeeding month to the investors who have provided valid Permanent Account Number (PAN) / PAN Exempt KYC Registration Number (PEKRN).

Due to this regulatory change, AMC has now ceased sending physical account statement to the investors after every financial

Please note that the Bandhan Branch offices at • **Gorakhpur • Udaipur • Belgaum • Vizag • Thiruvananthapuram • Jamnagar • Dhanbad • Muzaffarpur • Bhavnagar** will not be an Official Point of Acceptance of transactions. Accordingly, no transaction applications / investor service requests shall be accepted at these branch offices and the same will continue to be accepted at Investor Service Centre (ISC) of Computer Age Management Services Ltd. (CAMS), the Registrar of Bandhan Mutual Fund.

Point of Service locations (“POS”) of MF Utilities India Private Limited (“MFUI”)

All the authorised MFUI POS designated by MFUI from time to time shall be the Official Points of Acceptance of Transactions. In addition to the same, investors can also submit the transactions electronically on the online transaction portal of MFUI (www.mfuonline.com). To know more about MFU and the list of authorised MFUI POS, please visit the MFUI website (www.mfuindia.com). Website / Electronic modes - Bandhan AMC shall accept transactions through its website

(www.Bandhanmutual.com). Transactions shall also be accepted through other electronic means including through secured internet sites operated by CAMS with specified channel partners (i.e. distributors) with whom AMC has entered into specific arrangements. The servers of Bandhan AMC and CAMS, where such transactions shall be sent shall be the official point of acceptance for all such online / electronic transaction facilities offered by the AMC.

NSE MFSS / BSE STAR / ICEX - Eligible Brokers/Clearing Members/Depository Participants / Distributors will be considered as the Official Point of Acceptance for the transactions through NSE MFSS, BSE STAR and ICEX platforms.

MFCentral as Official Point of Acceptance:

For enhancing investors' experience in Mutual Fund transactions / service requests, the Qualified RTAs (QRTA's), Kfin Technologies Private Limited (Kfintech) and Computer Age Management Services Limited (CAMS) have jointly developed MFCentral - A digital platform for Mutual Fund investors.

MFCentral is created with an intent to be a one stop portal / mobile app for all Mutual fund investments and service-related needs that significantly reduces the need for submission of physical documents by enabling various digital / phygital services to Mutual fund investors across fund houses subject to applicable Terms & Conditions of the Platform. MFCentral may be accessed using <https://mfcentral.com/>

Any registered user of MFCentral, requiring submission of physical document as per the requirements of MFCentral, may do so at any of the designated Investor Service centres or collection centres of Kfintech or CAMS.
