Change in Investment Pattern

The Scheme may review the above pattern of investments based on views on markets, interest rates and asset liability management needs. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme. Subject to the Regulations, the asset allocation pattern

It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions can vary substantially depending upon the perception of the fund manager; the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be in accordance with clause 1.14.1.2 of SEBI Master Circular for Mutual Funds dated June 27, 2024, as amended from time to time, for short term and for defensive considerations only. In case the portfolio of the Scheme is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee of the AMC. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to sixty (60) Business Days from the date of completion of mandated rebalancing period. The AMC shall comply with the requirements prescribed under aforementioned clause of SEBI Master Circular dated June 27, 2024, as amended from time to time.

INVESTMENT STRATEGY : The Fund of Fund will be following active investment strategy. The scheme will predominantly invest in the units of Arbitrage and Debt Mutual Fund Schemes as per the asset allocation pattern of the Scheme commensurate with the risk profile of the investments and subject to permitted limits. The allocation to the underlying scheme(s) will be dependent on fund managers view on current market conditions and outlook.

The debt portion of the portfolio will be invested in debt funds based on the interest rate outlook. The equity proportion of the portfolio will be managed by investing in the fund with an arbitrage strategy to take advantage from the price differentials / mis-pricing prevailing for stock / index in various market segments (Cash & Futures). This allocation leverages the strengths of both asset classes, providing a diversified, risk-managed investment vehicle capable of delivering consistent returns in varying market conditions.

Arbitrage strategy in equity can generate returns with lower risk compared to traditional equity investing. while Fixed Income Funds can provide stability & hedge to volatility from macro economic & micro market disturbances. This scheme will not make any investment decisions pertaining to the constituents of the underlying fund(s) and shall only invest through funds across the Debt & Equity asset class. The scheme may also invest in money market instruments as stated in the asset allocation table.

RISK PROFILE OF THE SCHEME : Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.

Scheme Specific Risk Factors

Some of the specific risk factors related to the Scheme include, but are not limited to the following:

The FoF Scheme will be allocating assets in a basket of Arbitrage Fund, basket of Debt Fund & Money Market Funds, and Money Market Instruments. Hence, scheme specific risk factors of the underlying schemes will be applicable. All risks associated with the different asset classes of the underlying schemes, including performance of their underlying securities, derivative instruments, stock-lending etc., will therefore be applicable in the case of this Fund of Funds Scheme. Investors who intend to invest in Fund of Funds are required to and are deemed to have read and understood the risk factors of the underlying scheme relevant to the FoFs Scheme that they invest in.

Any change in the investment policies or fundamental attributes of the underlying schemes will affect the performance of this FoF Scheme.

The liquidity of the Scheme(s) investments is inherently restricted by liquidity of Underlying Scheme.

This being a FoF Scheme, the investors should note that the expenses to be borne by the investor include the recurring expenses of the underlying scheme in which FoF Scheme makes investments subject to the maximum limits prescribed under sub-regulation 6 & 6A of Regulation 52 of the SEBI Regulations.

As the FoF scheme will invest into an underlying scheme, the expense charged being dependent on the structure of the underlying scheme (being different), it may lead to a non- uniform charging of expenses over a period of time.

As the investors are incurring expenditure at both the Fund of Funds level and the scheme into which the FoF invests, wherever applicable, the returns that they may obtain may be materially impacted or may at times be lower than the returns that investors directly investing in such scheme obtain.

The Portfolio disclosure / Factsheet of this Scheme will be limited to providing the particulars of the allocation to the underlying schemes where the Scheme has invested and will not include the investments made by the underlying schemes. Investors may refer to the portfolios of the relevant underlying schemes for details.

Switch-out from an underlying scheme and Switch into another underlying scheme will be subject to the provisions of applicability of NAV as also the payout and pay-in cycles applicable to redemption / purchase under the relevant schemes. In times of extreme volatility, this may have impact on the NAV of the Scheme, particularly at the time of portfolio rebalancing. Purchase of units in underlying schemes will attract applicable stamp duty.

Redemptions by the Scheme from the underlying schemes would be subject to applicable exit loads, which may impact performance of the Scheme.

A Fund Manager managing any one of the FoF schemes may also be the Fund Manager for the underlying schemes.

Different types of securities in which the Scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the Scheme's risk may increase or decrease depending upon its investment pattern.

1. Risks associated with the underlying Scheme's Arbitrage Strategies:

- o The primary objective of the Fund Manager is to identify investment opportunities and to exploit price discrepancies in various markets. Identification and exploitation of the strategies to be pursued by the Fund Manager involve uncertainty. No assurance can be given that Fund Manager will be able to locate investment opportunities or to correctly exploit price discrepancies in the capital markets. Reduction in mis-pricing opportunities between the cash market and Future and Options market may lead to lower level of activity affecting the returns. As the Scheme proposes to execute arbitrage transactions in various markets simultaneously through underlying fund, this may result in high portfolio turnover and, consequently, high transaction cost.
- o There may be instances, where the price spread between cash and derivative market is insufficient to meet the cost of carry. In such situations, the Fund Manager due to lack of opportunities in the derivative market, may not be able to outperform liquid / money market funds.
- o Under certain conditions, the Fund Manager may not be able to hold simultaneous positions in the cash and derivative market for the underlying Scheme, due to poor liquidity in the future/ spot market. However, the Scheme will endeavor to take exposure in those stocks where there is sufficient liquidity in the cash and derivative market, thereby minimizing the risk to square off the transaction.
- o In case of a large redemption, the underlying Scheme may need to reverse the spot-futures transaction before the date of futures' settlement. This eventuality may lead to the basis risk.
- o While reversing the spot-futures transaction on the Futures & Options settlement day on the Stock Exchange, there could be a risk of volume-weighted-average-price of the market being different from the price at which the actual reversal is processed. This may result in basis risk.

2. Risks associated with investing in Fixed Income Securities/Bonds of the underlying Schemes:

The following are the risks associated with investment in Fixed Income Securities/Bonds:

Interest Rate Risk: This risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. Fixed income securities such as government bonds, corporate bonds, and money market instruments etc. run price-risk or interest-rate risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices generally increase. The extent of fall or rise in the prices depends upon factors such as coupon, maturity of the security, the yield level at which the security is being traded. The longer the time to a bond's maturity, the greater is its interest rate risk. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.

Re-investment Risk: Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

Basis Risk: This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying being hedged. The underlying benchmark of a floating rate security might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements, leading to loss of value of the portfolio. Where swaps are used to hedge an underlying fixed income security, basis risk could arise when the fixed income yield curve moves differently from that of the swap benchmark curve

Spread Risk: Yield Spreads between fixed income securities might change. Example: Corporate Bonds are exposed to the risk of widening of the spread between corporate bonds and gilts. Prices of corporate bonds tend to fall if this spread widens which might adversely affect the NAV of the scheme. Similarly, in case of floating rate securities, where the coupon is expressed in terms of a spread or mark up over the benchmark rate, widening of the spread results in a fall in the value of such securities.

Liquidity Risk: This risk pertains to how saleable a security is in the market or the ease at which a security can be sold at or close to its true value. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of some of the investments. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. The liquidity of debt securities may change, depending on market conditions. At the time of selling the security, the security can become less liquid (wider spread) or illiquid, leading to loss in value of the portfolio. Securities that are unlisted generally carry a higher liquidity risk compared to listed securities.

Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring mark to market losses and losses when the security is finally sold.

Liquidity risk is greater for thinly traded securities, lower-rated bonds, bonds that were part of a smaller issue, bonds that have recently had their credit rating downgraded or bonds sold by an infrequent issuer may be relatively illiquid. Bonds are generally the most liquid during the period right after issuance when the bond typically has the highest trading volume.

Credit Risk/ Default Risk: Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest and /or principal payment obligations and/or on violation of covenant(s) and/or delay in scheduled payment(s). Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer.

Government Security is a sovereign security and the default risk is considered to be the least. Corporate bonds carry a higher credit risk than Government Securities and among corporate bonds there are different levels of safety. Credit risks of most issuers of debt securities are rated by independent and professionally run rating agencies. Ratings of Credit issued by these agencies typically range from "AAA" (read as "Triple A" denoting "Highest Safety") to "D" (denoting "Default"). A bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.

Duration risk: The modified duration of a bond is a measure of its price sensitivity to interest rates movements, based on the average time to maturity of its interest and principal cash flows.

Bond portfolio managers increase average duration when they expect rates to decline, to get the most benefit, and decrease average duration when they expect rates to rise, so minimize the negative impact. If rates move in a direction contrary to their expectations, they lose.

Inflation risk: Inflation causes tomorrow's currency to be worth less than today's; in other words, it reduces the purchasing power of a bond investor's future interest payments and principal, collectively known as "cash flows." Inflation also leads to higher interest rates, which in turn leads to lower bond prices. Inflation-indexed securities such as Treasury Inflation Protection Securities (TIPS) are structured to remove inflation risk.

Performance Risk: Performance of the Scheme may be impacted with changes in factors which affect the capital market and in particular the debt market.

Prepayment Risk: The borrower may repay the receivables earlier than scheduled, which may result in change in the yield and tenor for the Scheme.

Call risk: Some corporate have a "call provision" entitling their issuers to redeem them at a specified price on a date prior to maturity. Declining interest rates may accelerate the redemption of a callable bond, causing an investor's principal to be returned sooner than expected. In that scenario, investors have to reinvest the principal at the lower interest rates. (See also Reinvestment risk.)

Concentration Risk: To the extent that the Scheme may concentrate its investments in the underlying schemes which invest in Securities of companies of certain companies/sectors, the Scheme will therefore be subject to the risks associated with such concentration. This risk may impact the Scheme to the extent that it invests in underlying schemes with focus on particular sectors even in cases where the investment objective is more generic.

Legislative Risk: This is the risk that a change in the tax code could affect the value of taxable or tax exempt interest income.

3. Risks associated with investing in Securities Segment and Tri-party Repo trade settlement:

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time i.e. in the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund.

4. Risks Factors Associated with Creation of Segregated Portfolio:

The unitholders may note that no redemption and subscription shall be allowed in segregated portfolio. However, in order to facilitate exit to unitholders in segregated portfolio, the AMC shall enable listing of units of segregated portfolio on the recognized stock exchange. The risks associated in regard to the segregated portfolio are as follows:

- o The investors holding units of the segregated portfolio may not be able to liquidate their holdings till the time of recovery of money from the issuer.
The security comprising the segregated portfolio may not realize any value.
- o Listing of units of the segregated portfolio on a recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units of the segregated portfolio on the stock exchange.
- o The trading price of units on the stock exchange may be significantly lower than the prevailing Net Assets Value (NAV) of the segregated portfolio.

For the detailed provisions in relation to segregated portfolios, investors are requested to refer the Statement of Additional Information (SAI) of Union Mutual Fund.

5. Risks associated with transaction in Units through stockexchange(s):

In respect of transaction in Units of the Scheme through BSE and / or NSE (applicable as and when the facility to transact in the Units of the Scheme through the Stock Exchange mechanism is provided by the AMC), allotment and redemption of Units on any Business Day will depend upon the order processing / settlement by BSE and / or NSE and their respective clearing corporations on which the Fund has no control.

For details on risk factors and risk mitigation measures, please refer SID.

- **Direct Plan:** Direct Plan is only for investors who purchase /subscribe Units in the Scheme directly with Union Mutual Fund and is not available for investors who route their investments through a Distributor (AMFI registered distributor / ARN Holder). - **Regular Plan:** Regular Plan is for investors who purchase /subscribe Units in the scheme through a Distributor.

Default Plan:

The treatment of applications under "Direct" / "Regular" Plans shall be as follows:

Scenario	Broker Code mentioned by the investor (Provided broker is empaneled with AMC)	Plan mentioned by the investor	Default Plan to be captured

The Scheme has the following Options offered under each of the above mentioned Plans:

- **Growth Option:** This option is suitable for investors who are not seeking IDCW but who invest only with the intention of capital appreciation.
- **Income Distribution cum Capital Withdrawal (IDCW) Option:** This option is suitable for investors seeking income through IDCW declared by the Scheme. Under this option, the scheme will endeavour to declare IDCW from time to time. The IDCW shall be dependent on the availability of distributable surplus.

When units are sold, and sale price (Net Asset Value) is higher than face value of the unit, a portion of sale price that represents realized gains is credited to an Equalization Reserve Account which can be used to pay IDCW. Investors are requested to note that, under the aforesaid Option, the amounts can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. Whenever distributable surplus will be distributed, a clear segregation between income distribution (appreciation on NAV) and capital distribution (Equalization Reserve) shall be suitably disclosed in the Consolidated Account Statement provided to investors.

The Income Distribution cum Capital Withdrawal Option has the following facilities:

- Reinvestment of Income Distribution cum Capital Withdrawal Option
- Pay-out of Income Distribution cum Capital Withdrawal Option
- Transfer of Income Distribution cum Capital Withdrawal Plan

Default Option / Facility: In cases where the investor fails to opt for a particular Option at the time of investment, the default Option will be Growth.

If the investor chooses Income Distribution cum Capital Withdrawal Option and fails to mention a Facility then the default Facility will be Reinvestment of Income Distribution cum Capital Withdrawal Option.

If the IDCW payable under the Transfer of Income Distribution cum Capital Withdrawal Plan or Payout of Income Distribution cum Capital Withdrawal Option is equal to or less than ₹ 500 then the IDCW would be compulsorily reinvested in the existing option of the Scheme.

If an investor opts for Transfer of Income Distribution cum Capital Withdrawal Plan, the investor must meet the minimum balance criterion in the target scheme and in the same folio, else the IDCW will be compulsorily re-invested in the source scheme.

The AMC shall be liable to pay interest to the unitholders at such rate as may be specified by SEBI for the period of such delay (presently @ 15% per annum).

The actual declaration of IDCW and the rate of IDCW will inter alia, depend on availability of distributable surplus calculated in accordance with SEBI (Mutual Funds) Regulations, 1996 and the decisions of the Trustee shall be final in this regard. There is no assurance or guarantee to the unitholders as to the rate of IDCW distribution nor that IDCW will be declared regularly.

On payment of IDCW, the NAV of the Units under the Income Distribution cum Capital Withdrawal Option will fall to the extent of the IDCW payout and applicable statutory levies, if any. For further details please refer the SID of the Scheme.

2) KYC COMPLIANCE WITH ANTI MONEY LAUNDERING (AML) REGULATIONS

In accordance with requirements under the Prevention of Money Laundering Act, 2002, (PMLA) the Rules issued there under and the guidelines and circulars on Anti-Money Laundering issued by SEBI, (collectively "AML Regulations"), mutual funds are required to formulate and implement Client Identification Programme to verify and maintain the record of identity and address(es) of investors. This is commonly referred to as 'Know Your Client' guidelines (KYC).

With a view to streamline implementation of KYC procedures and ensure compliance with the AML Regulations, the mutual fund industry had collectively put in place arrangement with an independent agency (CDSL Ventures Limited) that acted as central record keeping agency ('Central Agency'), and as Central Agency had the responsibility for collection of documents relating to identity and address of investors.

In order to avoid duplication of KYC process with every SEBI registered intermediary and with a view to bringing about uniformity in the KYC requirement and a mechanism for centralization of the KYC records in the securities market, SEBI has vide its various circulars and the SEBI (KYC Registration Agency) Regulations 2011, introduced common KYC across market intermediaries.

With effect from January 01, 2012 ("Effective Date"), SEBI has introduced a common KYC Application Form for all the SEBI registered intermediaries viz. Mutual Funds, Portfolio Managers, Depository Participants, Stock Brokers, Venture Capital Funds, Collective Investment Schemes, etc.

Following are the KYC requirements for new / prospective investors and existing investors:

i. KYC requirements for new / prospective investors:

New/ Prospective Investors are requested to use the common KYC Application Form and carry out the KYC process including In-Person Verification (IPV) with any SEBI registered intermediaries including mutual funds. The KYC Application Forms are available on the website www.unionmf.com.

The Mutual Fund shall perform the initial KYC of its new investors and may also undertake enhanced KYC measures commensurate with the risk profile of its investors in line with the aforesaid circulars / Prevention of Money Laundering Act, 2002, and circulars thereto. The Mutual Fund shall

upload the details of the investors on the system of the KYC Registration Agency (KRA). Registrar & Transfer Agent (RTA) of the Mutual Fund may also undertake the KYC of the investors on behalf of the Mutual Fund. On receipt of initial/updated KYC documents from the Mutual Fund, the KRA shall send a letter to the investor within SEBI prescribed timelines, confirming the details thereof.

It is mandatory for intermediaries including mutual funds to carry out In-Person Verification (IPV) of its new investors from the Effective Date. The IPV carried out by any SEBI registered intermediary can be relied upon by the Mutual Fund. The AMC and National Institute of Securities Markets (NISM)/Association of Mutual Funds in India (AMFI) certified distributors who are Know Your Distributor (KYD) compliant are authorised to undertake the IPV for Mutual Fund investors. Further, in case of any applications received directly (i.e. without being routed through the distributors) from the investors, the Mutual Fund may rely upon the IPV (on the KYC Application Form) performed by the scheduled commercial banks.

Further, the Government of India has authorized the Central Registry of Securitization and Asset Reconstruction and Security interest of India (CERSAI), to act as, and to perform the functions of, the Central KYC (CKYC) Records Registry under the PML Rules 2005, including receiving, storing, safeguarding and retrieving the KYC records in digital form of a client, as defined in the Prevention of Money Laundering Act, 2002. Every reporting entity is required to capture the KYC information for sharing with the Central KYC Records Registry (CKYCR). Accordingly, the investors shall be required to provide requisite KYC information/ documents as prescribed by CERSAI and the AMC from time to time. Investors who have already completed CKYC and have a KYC Identification Number (KIN) can invest in the Mutual Fund by quoting the KIN and by submitting a self certified copy of PAN and by completing In-Person Verification (IPV) as mentioned above

ii. KYC requirements for existing investors:

Existing KYC compliant investors of the Mutual Fund can continue to invest as per the current practice. However, pursuant to SEBI circular no. MIRSD/ Cir-5 /2012 dated April 13, 2012 and subsequent SEBI communication, investors who had completed the erstwhile Centralised Mutual Fund KYC through CDSL Ventures Limited, are required to provide KYC details and complete IPV as per the new KYC requirements, which was not mandated earlier.

It is mandatory for all categories of investors to be KYC compliant for any amount of investment.

AMC reserves the right to reject application forms for transactions in units of the Mutual Fund not accompanied by common KYC Application Form or letter/ acknowledgement issued by the KRA/KIN issued by CERSAI. The KYC compliance status of the investors will be validated with the records of the KRA/CERSAI. For units held in demat form the KYC performed by the Depository Participant of the applicants will be considered as KYC verification done by the Trustee/AMC. In relation to implementation of the SEBI Guidelines on identification of Beneficial Ownership, the AMC reserves the right to call for such information / documents from the investors that the AMC deems fit.

For further details, please refer to the Section on "Prevention of Money Laundering and Know Your Client ("KYC") requirements" in the Statement of Additional Information (SAI).

'Bank account details mandatory for all Investors'** under section 'How to Apply?' of the SAI.
