#### Portfolio Rebalancing & Change in Investment Pattern

Subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the Unit holders.

#### • Portfolio Rebalancing

Pursuant to Para 2.9 related to 'Timelines for Rebalancing of Portfolios of Mutual Fund Schemes' of the SEBI Master Circular dated June 27, 2024, in the event where the asset allocation is falling outside the limits specified in the asset allocation table due to passive breaches (occurrence of instances not arising out of omission and commission of AMC, including any involuntary corporate actions such as amalgamation, scheme of arrangement, reduction of capital, bonus issue, consolidation, conversion and the like), the Scheme will rebalance the portfolio within thirty (30) business days. However, if market conditions do not permit the Fund Manager to rebalance the portfolio of the Scheme within the stipulated period of thirty (30) business days, justification in writing including details of efforts taken to rebalance the portfolio for the same shall be provided to the Investment Management Committee. The Investment Management Committee shall then decide on the course of action and if they so desires can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period. Further compliances relating to disclosures etc. shall be adhered in line with the said circular.

It may please be noted that the AMC shall adhere to all the SEBI guidelines regarding the rebalancing of the asset allocation as stipulated from time to time.

In this event where the asset allocation falling outside the limits specified in the asset allocation table due to defensive considerations (active breaches), the Scheme will rebalance the portfolio within thirty (30) calendar days from the date of deviation.</p> <p>However, justification for the same shall be provided to the Investment Management Committee in writing. The Investment Management Committee shall then decide on the course of action.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>Investment Strategy</b> | <p><b>For Equity Segment:</b></p> <p>The Schemes will endeavour to maintain a minimum exposure of 25% of its total assets in each market capitalization i.e. large-cap, mid cap and small cap.</p> <p>As defined by Para 2.7 of the SEBI Master Circular on Mutual Fund dated June 27, 2024, the Large cap, Mid cap and Small cap are classified as below:</p> <ol style="list-style-type: none"> <li>Large Cap: 1st - 100th company in terms of full market capitalization.</li> <li>Mid Cap: 101st - 250th company in terms of full market capitalization.</li> <li>Small Cap: 251st company onwards in terms of full market capitalization.</li> </ol> <p>Our investment philosophy is to generate consistent, long-term, risk-adjusted returns. Our stock selection framework will seek to add value through our differentiated insights or our variant perception on stocks and sectors.</p> <p>We will evaluate investment opportunities taking in account:</p> <ol style="list-style-type: none"> <li>1) Megatrends in the environment and economy</li> <li>2) Leadership potential of the company</li> <li>3) Longevity of the business model</li> <li>4) Intangibles and other intrinsic edges that the company possesses.</li> </ol> <p><b>For Debt Segment:</b></p> <p>The fund management team will endeavor to maintain a consistent performance in the scheme by maintaining a balance between safety, liquidity and profitability aspects of various investments. The fund manager will try to achieve an optimal risk return balance for management of the fixed income portfolios. The investments in debt instruments carry various risks like interest rate risk, liquidity risk, default risk, purchasing power risk etc. While they cannot be done away with, they can be minimized by diversification and effective use of hedging techniques.</p> <p>The fund management team will take an active view of the interest rate movement by keeping a close watch on various parameters of the Indian economy, as well as developments in global markets. Investment views/decisions will be taken on the basis of the following parameters:</p> <ol style="list-style-type: none"> <li>i. Prevailing interest rate scenario</li> <li>ii. Quality of the security/instrument (including the financial health of the issuer)</li> <li>iii. Maturity profile of the instrument</li> <li>iv. Liquidity of the security</li> <li>v. Growth prospects of the company/industry</li> <li>vi. Any other factors in the opinion of the fund management team</li> </ol> <p><b>For Derivatives Segment:</b></p> <p>The Scheme may take derivatives position based on the opportunities available subject to the guidelines issued by SEBI from time to time and in line with the overall investment objective of the Scheme. These may be taken to hedge the portfolio, rebalance the same or to undertake any other strategy as permitted under the SEBI Regulations.</p> <p><b>Portfolio Turnover:</b></p> <p>The Scheme being an open-ended Scheme, it is expected that there would be a number of subscriptions and redemptions on a daily basis. The fund management team depending on its view and subject to there being an opportunity, may trade in securities, which will result in increase in portfolio turnover. There may be an increase in transaction cost such as brokerage paid, if trading is done frequently. However, the cost would be negligible as compared to the total expenses of the Scheme.</p> <p>Frequent trading may increase the profits which will offset the increase in costs. The fund manager will endeavour to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. However, it is difficult to estimate with reasonable measure of accuracy, the likely turnover in the portfolio of the Scheme. The Scheme has no specific target relating to portfolio turnover.</p> |

| <b>Risk Profile of the Scheme</b> | <p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:</p> <ul style="list-style-type: none"> <li> <b>Risk Associated with Equity and Equity Related Instruments:</b><br/>           Equity and Equity Related Instruments by nature are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of Equity and Equity Related Instruments may fluctuate due to factors affecting the securities markets such as volume and volatility in the capital markets, interest rates, currency exchange rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, general decline in the Indian markets, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAVs of the Units issued under the Scheme may be adversely affected.         </li> <li> <b>Risk Factors Related to Mid Cap and Small Cap Stocks:</b><br/>           The mid cap and small cap stocks carry higher liquidity risk as they are less extensively researched compared to large cap stocks and mid cap stocks, as applicable. This may lead to abnormal illiquidity and consequent higher impact cost.         </li> <li> <b>Risk Associated with Investments in Foreign Securities :</b><br/>           The Scheme may invest in overseas markets subject to necessary approvals and within the investment objectives of the Scheme. Such investments carry risks related to and not limited to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances.<br/><br/>           The AMC believes that investment in foreign securities offers new investment and portfolio diversification opportunities into multi-market and multi-currency products. However, such investments also entail additional risks. Such investment opportunities may be pursued by the AMC provided they are considered appropriate in terms of the overall investment objectives of the Scheme. Since the Scheme would invest only partially in foreign securities, there may not be readily available and widely accepted benchmarks to measure performance of the Scheme.<br/><br/>           To the extent the assets of the scheme(s) are invested in overseas financial assets, there may be risks associated with currency movements, restrictions on repatriation and transaction procedures in overseas market. Further, the repatriation of capital to India may also be hampered by changes in regulations or political circumstances as well as the application to it of other restrictions on investment. In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilization of the overseas financial assets and the prevalent tax laws of the respective jurisdiction for execution of trades or otherwise.<br/><br/> <b>Currency Risk:</b> To the extent that the assets of the Scheme will be invested in foreign securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.<br/><br/> <b>Regulatory Limit Risks:</b> The Scheme's investments in overseas securities is subject to the regulatory limits applicable for overseas investments as prescribed by RBI/SEBI from time to time and as per the regulations prevailing in the overseas jurisdiction where investments are made/intended to be made. In this regard, overseas investments will be halted, if such limit is breached either at the mutual fund level or at mutual fund industry level.<br/><br/>           To manage risks associated with foreign currency and interest rate exposure, the Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI / RBI from time to time.<br/><br/>           The investment in foreign securities is subject to approval from SEBI on the same.         </li> <li> <b>Risks Associated with Investing in Derivatives:</b><br/>           Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.         </li> <li> <b>Risks associated with investing in debt and/or Money Market Securities like Interest Rate Risk, Re-investment Risk, Spread Risk, Liquidity Risk, Credit Risk/Default Risk, Counterparty Risk, Settlement Risk, Duration Risk, etc.</b> </li> <li> <b>Risks associated with Performance of the scheme:</b> The Scheme's performance can decrease or increase, depending on a variety of factors, which may affect the values and income generated by the Scheme's portfolio of securities. The returns of the Scheme's investments are based on the current yields of the securities, which may be affected generally by factors affecting markets such as price and volume, interest rates, currency exchange rates, changes in government and Reserve Bank of India policy and taxation, political, economic or other developments.<br/><br/>           The Schemes portfolio may also have risks associated with securities lending, Tier I &amp; Tier II Bonds, repo transactions in corporate bonds, segregated portfolio, IRFs, REIT &amp; INVTs, etc.<br/><br/>           For details on risk factors and risk mitigation measures, please refer to the SID.         </li> </ul> |

Consolidation shall be done on the basis of Permanent Account Number (PAN). In the event the folio/demat account has more than one registered holder, the first named Unit holder/Account holder shall receive the SCAS. Consolidation shall be based on the common sequence /order of investors in various folios/ demat accounts across mutual funds/demat accounts across depository participants.

In case of multiple accounts across two depositories, the depository with whom the demat account has been opened earlier will be the default depository which will consolidate the details across depositories and Mutual Fund investments and dispatch the SCAS to the unit holders.

Unit holders whose folio(s)/demat account(s) are not updated with PAN shall not receive SCAS. Unit holders are therefore requested to ensure that their folio(s)/demat account(s) are updated with PAN.

For Unit holders who have provided an e-mail address in KYC records, the SCAS will be sent by e-mail.

The Unit holders may request for account statement for mutual fund units held in physical mode. In case of a specific request received from the Unit holders, account statement shall be provided to the unit holders within 5 business days from the receipt of such request.

No account statements will be issued to unit holders opted to hold units in demat mode, since the statement of account furnished by depository participant periodically will contain the details of transactions.

SCAS sent within the time frame mentioned above is provisional and is subject to realisation of payment instrument and/or verification of documents, including the application form.

Further, in case of any applications received directly (i.e. without being routed through the distributor) from the unit holder, the Fund may rely upon the PFV (on the KYC Application Form) performed by the scheduled intermediaries.
4. Ongoing KYC compliance and holders of the Fund can continue to invest as per the current practice. However, existing unit holders are also urged to comply with the new KYC requirements including PFV as mandated by SEBI.

Application Form not accompanied by KYC Application Form or letter/acknowledgment issued by KYRA may be rejected by the Fund. The KYC compliance status will be verified with the records of the KYRA. AMC reserves the right to call for any additional information from the unit holder/s and/or reject applications/subsequent application in order to fulfil the requirements of PMLA as prescribed by SEBI/PMLA regulation from time to time.
