Note 1: Investments in Short Term Deposits:

Pending deployment of funds of the Scheme, the AMC may invest funds of the Scheme in short-term deposits of scheduled commercial banks, subject to the following conditions issued by SEBI vide clause 12.16 of SEBI Master Circular:

1. "Short Term" for parking of funds shall be treated as a period not exceeding 91 days.
2. Such short-term deposits shall be held in the name of the Scheme.
3. The Scheme shall not park more than 15% of their net assets in the short term deposit(s) of all the scheduled commercial banks put together. However, it may be raised to 20% with the prior approval of the Trustee. Also, parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the Mutual Fund in short term deposits.
4. The Scheme shall not park more than 10% of their net assets in short term deposit(s) with any one scheduled commercial bank including its subsidiaries.
5. The Trustee shall ensure that the funds of the Scheme are not parked in the short term deposits of a bank which has invested in the Scheme.
6. The Trustee shall also ensure that the bank in which a scheme has short term deposits do not invest in the scheme until the scheme has short term deposits with such bank.
7. AMC will not charge any investment management and advisory fees for parking of funds in short term deposits of scheduled commercial banks.

The above provisions do not apply to term deposits placed as margins for trading in cash and derivative market.

The underlying index shall comply with the below restrictions in line with clause 3.4 of SEBI Master circular:

- a) The index shall have a minimum of 10 stocks as its constituents.
- b) For a sectoral/ thematic Index, no single stock shall have more than 35% weight in the index. For other than sectoral/ thematic indices, no single stock shall have more than 25% weight in the index.
- c) The weightage of the top three constituents of the index, cumulatively shall not be more than 65% of the index.
- d) The individual constituent of the index shall have a trading frequency greater than or equal to 80% and an average impact cost of 1% or less over previous six months.

The net assets of the scheme will be invested in stocks constituting the Nifty 500 Index. This would be done by investing in all the stocks comprising the Nifty 500 Index in the same weightage that they represent in the Nifty 500 Index. A small portion of the net assets will be invested in Cash and Cash Equivalents.

Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. It can help in reducing the Tracking Error in the Scheme. Index futures/options may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the individual stocks. Equity Derivatives can be used as a tool for cash equitization and where the fund has got cash (within the maximum permissible asset allocation table), in case where rebalance comes, then instead of cash, index contract can be used for temporary basis. Index futures/options can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares comprising the underlying index and will be easy to settle compared to physical portfolio of shares representing the underlying index. In case of investments in index futures/options, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future/option. The Scheme will not maintain any leveraged or trading positions.

In accordance with clause 12.11 of SEBI Master Circular, the Scheme will not generally deploy more than 20% of its net assets in stock lending and not more than 5% of its net assets through a single intermediary (i.e the limit of 5% will be at broker level).

Timelines for deployment of funds collected in NFO

In line with SEBI circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2025/23 dated February 27, 2025, deployment of the funds garnered in an NFO shall be made within 30 business days from the date of allotment of units.

In an exceptional case, if the AMC is not able to deploy the funds in 30 business days, reasons in writing, including details of efforts taken to deploy the funds, shall be placed before the Investment Committee.

The Investment Committee, after examining the root cause for delay may extend the timeline by 30 business days.

Calculation of gross exposure:

As per clause 12.24 of SEBI Master Circular, the cumulative gross exposure through equity, derivative position and other permitted securities/ asset class as may be permitted by the Board from time to time subject to regulatory approvals, if any shall not exceed 100% of the net assets of the scheme. Cash and cash equivalents as per SEBI letter no. SEBI/HO/IMD-II/DOF3/OW/P/2021/31487/1 dated November 03, 2021 which includes T-bills, Government Securities, Repo on Government Securities and any other securities as may be allowed under the regulations prevailing from time to time subject to the regulatory approval, if any, having residual maturity of less than 91 Days, shall not be considered for the purpose of calculating gross exposure limit.

Portfolio rebalancing:

Rebalancing of deviation due to short term defensive consideration:

Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for a short term and defensive considerations as per clause 1.14.1.2 of SEBI Master Circular; the intention being at all times to protect the interests of the Unit Holders and the Scheme shall rebalance the portfolio within 7 calendar days from the date of deviation.

	It may be noted that no prior intimation/indication will be given to investors when the composition/asset allocation pattern under the Scheme undergoes changes within the permitted band as indicated above. Portfolio rebalancing in case of passive breach: In line with clause 3.6.7.1 of SEBI Master Circular, in case of change in constituents of the index due to periodic review, the portfolio of Scheme shall be rebalanced within 7 calendar days. Further, any transactions undertaken in the portfolio of Schemes in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the Index is maintained at all points of time. In the event of involuntary corporate action, the scheme shall dispose the security not forming part of the underlying index within 7 days from the date of allotment/listing. <u>Disclosure relating to extent and manner of participation in derivatives to be provided</u> Exposure to equity derivatives of the index itself or its constituent stocks may be undertaken when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions. Exposure to such derivatives will be restricted to 20% of net assets of the scheme. However, investment in derivatives will be for a temporary period on defensive considerations. The Scheme shall rebalance the portfolio in case of any deviation to the asset allocation. Such rebalancing shall be done within 7 calendar days from the date of such deviation. Investment in derivatives shall be made in accordance with clause 12.25 of SEBI Master Circular, SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 and such other guidelines on derivatives as issued by SEBI from time to time. CHANGE IN INVESTMENT PATTERN The Scheme, will hold all the securities that comprise the underlying index in the same proportion as the index. Expectation is that, over a period of time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low. The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances, such tracking error is not expected to exceed by 2% p.a. for daily 12 month rolling return. However, in case of events like, dividend issuance by constituent members, rights issuance by constituent members, and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Basket, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. Since the Scheme is an exchange traded fund, it will endeavor that at no point of time the scheme will deviate from the index. For numerical example of risk involved and more details please refer SID.
Investment Strategy	1. Strategy for Equity Securities The Scheme will be managed passively with investments in stocks in the same proportion as in Nifty 500 Index (underlying index). The investment strategy would revolve around minimizing the tracking error through periodic rebalancing of the portfolio, taking into account the change in weights of stocks in the indices as well as the incremental subscriptions / redemptions in the Scheme. A small portion of the net assets may be held as cash & cash equivalents to meet the liquidity requirements under the Scheme. 1. Strategy for Derivatives

	Exposure to equity derivatives of the index itself or its constituent stocks may be undertaken when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions for a temporary period on defensive considerations. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. For detailed derivative strategies, please refer to SAI. PORTFOLIO TURNOVER POLICY Portfolio Turnover measures the volume of trading that occurs in a Scheme's portfolio during a given time period. The Scheme is an open-ended fund, and it is expected that there may be a number of subscriptions and repurchases on a daily basis. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities included in the underlying Index. However, it will be the endeavor of the Fund Manager to maintain an optimal portfolio turnover rate commensurate with the investment objective of the Scheme and the purchase/ redemption transactions on an ongoing basis in the Scheme.
Risk Profile of the scheme	Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below: - Risks associated with transacting in scheme units through stock exchange mechanism - Risk associated with favorable taxation of certain scheme in India, - Risk factors associated with investment in passive schemes, - Risks associated with Equity and Equity-related securities / Investments, - Tracking Error and Tracking difference Risk - Risk factors associated with Cash and Cash Equivalents, - Risks associated with Securities Lending & Borrowing, - Risk associated with trading in derivatives, - Risk factors associated with investment in Tri-Party Repo, - Risk factor pertaining to investment in REITS For details on risk factors, please refer SID. <u>RISK MITIGATION STRATEGIES</u> Market Risk, Concentration Risk & Liquidity Risk: This being an open-ended scheme replicating/tracking equity index, above mentioned risks are inherent to this scheme similar to other equity schemes. The scheme being a passive fund will predominantly be investing in underlying index, the Investment Manager will endeavor to minimize above risks, however it will have a limited role in the same. Risk Associated with cash and cash equivalent: The scheme will invest in securities as per the intended allocation and thus this risk are low as compared to other risk mentioned above. The AMC will endeavor to minimize the Liquidity Risk, Interest Rate Risk, Reinvestment Risk.

	iii. Risk associated with Stock Lending: The investment managers will ensure adherence to the limits assigned for stock lending and will ensure that the liquidity Risk is managed actively within the portfolio liquidity limits by maintaining proper asset-liability match to ensure payout of the obligations. iv. Risk associated with derivatives: The investment managers will invest only in exchange traded derivatives (settlement guaranteed) and the investment shall be in line with guidelines and regulatory limits as specified by regulators & scheme documents. No investment will be made in OTC derivative contracts for equity derivatives. v. Tracking Error and tracking difference: The Investment Manager would monitor the tracking error and tracking difference of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. The investment manager will endeavour to maintain low cash levels to minimize tracking error and tracking difference.
